

# KURAK ALLIANCE

## The Defenders of the Storm Zone

**A**nton Kurak of Centaurs was the last Charter President of the Terran Alliance whose term of office took place wholly during peacetime. However, Kurak was also one of the few Terran leaders to take seriously the idea of a Dindrenzi invasion.

Kurak deepened Terran ties to their traditional allies, the Aquan Sebrutan and the Sorylian Collective. In the last years of his presidency, Kurak secured a mutual defensive pact with both powers, forming the core of his Alliance.

Kurak enlisted Hawker Industries, which had extensive contacts with several alien races who the President felt could be potential partners. The hardy Terquai joined the pact without hesitation in solidarity with both the Aquan Sebrutan and the Terran Alliance.

The bird-like Xelocians and the bitter, exiled Ryushi became signatories to Kurak's coalition through Hawker's efforts. The Xelocians' great Mother-Fleet and their expeditionary flotillas had come under attack from a variety of raiders believed to be sponsored by Dindrenzi-affiliated powers. The Ryushi, meanwhile, had been driven from their original Outer Reach

homeworlds and hungered for revenge.

Hawker's efforts also induced the Alliance's most volatile members to sign up. The fierce Veydreth of Muishkin's Rift had once plagued Terra's galactic southern colonies. However, Kurak tempted many tribes into his Alliance as mercenaries. The Veydreth, always adventurous and enthusiastic warriors, flocked to Kurak's banner in great numbers.

But it was the last power to join Kurak's coalition that was the most surprising. Only a few weeks before Kurak's presidency ended, a delegation from the mysterious Tarakian Conclaves made contact with his office, pledging their support.

The Alliance of Kurak almost came to nothing before the war even broke out, when Kurak was replaced as Charter President by Umar Sallandro. However, it was the coming of the war that vindicated Kurak's long struggle. Now Secretary-General of Alien Affairs, Kurak marshals his Alliance against the forces of the perfidious Zenian League.

ARMADA**

# FLEET MANUAL

# AQUAN PRIME

GUARDIANS OF CSERA

As described in the Fleet Building chapter of the rulebook, one of the first things you will need to do before beginning a game of Firestorm Armada is construct your Fleet.

To build an Aquan Prime Fleet, you will use the Fleet Building chapter in the rulebook in conjunction with the information presented here, specifically the Composition Tables below and the Statistics Profiles listed on the following pages.

Each possible size of Fleet (Patrol Fleet, Battle Fleet or Grand Fleet) as determined by Maximum Fleet Value (MFV) has its own Composition Table. This table describes how many Squadrons of each Designation of model can be taken in the Fleet, including any allied choices. For example, a Patrol Fleet can contain up to two Squadrons with the Cruiser Designation.

## Patrol Fleets

If the agreed MFV is 800 Points or less, your Fleet is classed as a Patrol Fleet. You may select your Squadrons from the following list:

Tier 1 Between 1 and 2 Squadrons, chosen from the following:	
Up to 1	Battleship
Up to 2	Carriers
Up to 1	Heavy Cruiser Squadron
Up to 1	Battlecruiser
Up to 1	Battle Station

Tier 2 Between 1 and 2 Squadrons, chosen from the following:	
Up to 1	Escort Carrier Squadron
Up to 2	Cruiser Squadrons
Up to 2	Light Cruiser Squadrons
Up to 1	Destroyer Squadron
Up to 1	Assault or Torpedo Cruiser Squadron
Up to 1	Gunship Squadron
Up to 1	Defence Platform Squadron

Tier 3 Between 1 and 3 Squadrons, chosen from the following:	
Up to 2	Frigate Squadrons
Up to 2	Light Frigate Squadrons
Up to 3	Corvette Squadrons

**Important Note:** In a Patrol Fleet, the Battlecruiser's Squadron Size is reduced to 1.

Consult each model's Statistic Profile to find its Designation. You will notice that some of the Designations listed below cannot be found in the following Statistics pages. This is to accommodate both additional models that will follow in the future, and those available to Alliance Fleets as discussed on the next page.

The Composition Tables also divide the available Designations into Tiers. Each Tier has a minimum and a maximum limit, on top of the restrictions per designation. For example, in a Patrol Fleet you can field up to two Tier 1 Squadrons, chosen from up to 1 Battleship, up to 2 Carriers and so on.

Which Tier a Squadron falls into also affects how the Squadron influences your Battle Log, as described in the Victory Conditions chapter of the rulebook.

## Battle Fleets

If the agreed MFV is between 801 and 1200 Points, your Fleet is classed as a Battle Fleet. You may select your Squadrons from the following list:

Tier 1 Between 1 and 3 Squadrons, chosen from the following:	
Up to 2	Battleships
Up to 3	Carriers
Up to 1	Dreadnought
Up to 1	Battle Carrier
Up to 1	Battlecruiser Squadron
Up to 1	Battle Station

Tier 2 Between 1 and 3 Squadrons, chosen from the following:	
Up to 2	Escort Carrier Squadrons
Up to 3	Cruiser Squadrons
Up to 2	Heavy Cruiser Squadrons
Up to 2	Destroyer Squadrons
Up to 2	Assault or Torpedo Cruiser Squadrons
Up to 1	Gunship Squadron
Up to 1	Defence Platform Squadron

Tier 3 Between 2 and 3 Squadrons, chosen from the following:	
Up to 2	Light Cruiser Squadrons
Up to 3	Frigate Squadrons
Up to 2	Light Frigate Squadrons
Up to 3	Corvette Squadrons

## Grand Fleets

If the agreed MFV is between 1201 and 2000 Points, your Fleet is classed as a Grand Fleet. You may select your Squadrons from the following list:

Tier 1	
Between 2 and 4 Squadrons, chosen from the following:	
Up to 3	Battleships
Up to 4	Carriers
Up to 2	Dreadnoughts
Up to 2	Battle Carriers
Up to 2	Battlecruiser Squadrons
Up to 1	Leviathan
Up to 2	Battle Stations

Tier 2	
Between 2 and 4 Squadrons, chosen from the following:	
Up to 4	Cruiser Squadrons
Up to 3	Escort Carrier Squadrons
Up to 3	Heavy Cruiser Squadrons
Up to 2	Destroyer Squadrons
Up to 3	Assault or Torpedo Cruiser Squadrons
Up to 2	Gunship Squadrons
Up to 2	Defence Platform Squadron

Tier 3	
Between 3 and 5 Squadrons, chosen from the following:	
Up to 3	Light Cruiser Squadrons
Up to 4	Frigate Squadrons
Up to 3	Light Frigate Squadrons
Up to 4	Corvette Squadrons

## Mighty Armadas

If the agreed MFV is in excess of 2000 Points the force is divided into separate Fleets, each with its own Admiral, TACs, *etc.* A force of between 2001 and 2800 Points is formed into one Grand Fleet and one Patrol Fleet, while a force of between 2801 and 3200 Points is divided into one Grand Fleet and one Battle Fleet and so on.

Provided the minimum requirements for each Fleet can be met, you may divide your MFV between the Fleets as you see fit. For example, a 2300 Point force could contain a 1900 Point Grand Fleet and a 400 Point Patrol Fleet, or a 1500 Point Grand Fleet and an 800 Point Patrol Fleet.

## Alliance Fleets

In addition to selecting Squadrons of Aquan Prime models, up to one quarter of your Fleet's Maximum Fleet Value (rounded down) may be chosen from other races and factions

within the Alliance of Kurak, including vessels from the Terran Alliance and Sorylian Collective, and any of those found within the Alliance of Kurak Fleet Manual. This turns your Fleet into an 'Alliance Fleet'.

Your Fleet's minimum required Squadrons from each Tier MUST be from the Aquan Prime, and your Fleet Admiral must be placed on a Tier 1 Aquan Prime model.

Each Squadron uses the Command Distance of its race or faction and your Fleet's Fleet Tactics Bonus is the LOWEST from the races which make up your Fleet. Finally, an Alliance Fleet cannot take Tactical Ability Cards listed as 'Aquan Prime Only'; only General or Alliance of Kurak cards may be used.

Otherwise, each Squadron is chosen as normal, using up the relevant Squadron selection for its Tier and paying the required Points Cost, with all Upgrades, Hard Points and accompaniments available for purchase.

### Allied Squadrons

A single Squadron can only contain models from ONE race or faction. For example, a Squadron could not be comprised of two Terran Cruisers and an Aquan Heavy Cruiser.

The exception to this is where a Statistics Profile specifically lists models from another race or faction amongst its accompaniments. For example, an Aquan Battleship can be accompanied by '0-3 Alliance of Kurak Escorts'. These may come from any race or faction within the Alliance of Kurak, for the listed points cost.

**Important Note:** Even if the only models selected from outside the Aquan Prime are an Accompaniment to an Aquan model, the Fleet is still considered an Alliance Fleet, and any associated penalties in Fleet Tactics Bonus and Tactical Ability Card selection apply.

### Natural Alliance

Certain races and factions within the Firestorm Galaxy will work together more readily than others, their goals or origin making them Natural Allies.

Aquan Prime Fleets are Natural Allies with the Terquai Empire. One quarter of your MFV in an Aquan Prime Fleet may be chosen from Terquai Empire models, in addition to the one quarter allowed in an Alliance Fleet. This means a full half of an Aquan Fleet could be comprised of Terquai Empire models.

Additionally, if an Aquan Fleet contains only Aquan Prime and Terquai Empire models, 'Aquan Prime Only' TACs may be chosen and used by all Squadrons in the Fleet.

This document is intended to provide you with the various statistics needed to use our spaceship models with the Firestorm Armada 2.0 rules. This Fleet Manual is what we refer to as a 'living document', meaning that as new models are created their statistics will be added and the document will expand.

Additionally, should any errata be found with printed materials they will be reflected in this document. As such, you should always use the statistics found in this document as the default statistics when you are playing Firestorm Armada. Please refer back to this download on a regular basis to ensure that you are playing with the latest version of statistics.

# BATTLE CARRIER

## Dagon and Manta Class

Designation		BATTLE CARRIER

0-3 Alliance of Kurak Escorts						Variable	

# BATTLE STATION

## Vortex Class

**Important Note:** Installations, such as the Battle Station shown on this page, have two Movement values. The first is the distance that the Installation can move whilst under a player's control, just like any other model. The second is the distance that it will move during the End Phase of each Turn if the rules for Moving Terrain are being used. This movement is conducted in the same manner as other Terrain Movement.

Designation		BATTLE STATION					
Name		Vortex					
Size class		Large Capital					
Squadron size		1					
DR	CR	Mv	HP	CP	AP	PD	MN
8	12	2"/6"	9	7	4	6	0
Points Cost		Shield Rating		Wings		Turn Limit

Upgrades						Points	
Give all Beam Weapons the Precision Strike MAR						+5	
Give Torpedoes the Corrosive MAR						+10	

# DEFENCE PLATFORM

## Cyclone Class

Designation		DEFENCE SATELLITE					
Name		Cyclone					
Size class		Small					
Squadron size		2-4					
DR	CR	Mv	HP	CP	AP	PD	MN
5	6	0/6"	2	2	I	I	0
Points Cost		Shield Rating		Wings		Turn Limit	
20		I		0		0"	
Beam Weapons				10"	20"	30"	40"
Fore				3	4	-	-
Port/Starboard				3	4	-	-
Aft				3	4	-	-
MARs							
Difficult Target, Energy Transfer (I), No FSD, Orbit							
Hardpoints (I)						Points	
0-I +I HP						+5	
0-I Gain the Manoeuvrable MAR						Free	
Upgrades						Points	
Replace the Energy Transfer (I) MAR with the Energy Transfer (2) MAR						+5	

The Cyclone has been purpose built to shore up the defences of Aquan Sebrutan worlds blighted by the repeated incursions of the Directorate and their nefarious associates. Of incredibly tough semi-organic construction, the Cyclone is able to bear and blunt the thrust of an attacking force, buying time for escape - or retaliation.

# BATTLECRUISER

## Orca Class

The Orca Class Battlecruiser is the latest in military innovation for the Aquan Shoals. The first thing that strikes a military observer about the Orca is its speed. Boosting into battle on the latest bio-electric impulse drives, the Orca's power to mass ratio is far greater than many other vessels of a similar size.

Compass batteries of beam weapons cover all conceivable angles of approach, lashing out like rods of fire at any who enter their impressive range. Thick armour and high energy shields guard its hull and bombardments of corrosive torpedoes eat through Zenian hulls with a voracious appetite.

Designation		BATTLECRUISER					
Name		Orca					
Size class		Large Capital					
Squadron size		1-2					
DR	CR	Mv	HP	CP	AP	PD	MN
6	9	9"	6	5	4	4	6
Points Cost		Shield Rating		Wings		Turn Limit	
120		I		0		I"	
Beam Weapons				10"	20"	30"	40"
Starboard / Port				9	11	5	2
Fore				5	7	3	2
Aft				5	7	3	-
Torpedo Weapons				12"	24"	36"	48"
Any				6	6	6	6
MARs							
Drone Mines, Secured Bulkheads							
Hardpoints						Points	
Select up to ONE from the following:							
0-1: +1 Shield						+10	
0-1: +2" Mv						+10	
0-1: +3 Wing Capacity						+5	
Upgrades						Points	
Give all Beam Weapons the Energy Transfer (2) MAR						+10	
Give all Torpedo Weapons the Corrosive MAR						+5	
Accompaniment						Points	
If this Squadron contains only 1 model, it may be accompanied by:							
0-2 Barracuda, Chimaera or Piranha Class Frigates						+20 each	

# GUNSHIP

## Shiva Class

Designation		GUNSHIP					
Name		Shiva					
Size class		Medium Capital					
Squadron size		2					
DR	CR	Mv	HP	CP	AP	PD	MN
5	7	9"	5	6	4	4	0
Points Cost		Shield Rating		Wings		Turn Limit	
80		I		0		I"	
Beam Weapons				10"	20"	30"	40"
Starboard / Port				4	6	-	-
Fore				8	9	7	4
Torpedo Weapons				12"	24"	36"	48"
Any				6	6	6	6
MARs							
Reinforced (Fore), Secured Bulkheads							
Hardpoints						Points	
Select up to ONE from the following:							
0-I: +I Shield						+10	
0-I: Gain the Energy Transfer (I) MAR						+5	
Accompaniment						Points	
0-I Sulis Class Cruiser						+50 each	

# HEAVY CRUISER

## Sulis Class

### New MAR: Energy Locus (Value)

Once per turn, an Aquan Beam Weapon attack may be made by a friendly squadron with line of sight against the model with Energy Locus. The player then takes a Command Check (requiring the Energy Locus Value number of successes). If the check is passed, this value is **added** to the total Attack Dice Pool (after firing options). If failed, the value is **subtracted** from the Pool, to a minimum of 1 AD. In either case, the attack must then be immediately resolved against an enemy model within 20" and with line of sight to the model with Energy Locus.

Only one Energy Locus bonus may be added to any attack, and a model may NOT use the **Energy Locus** MAR on an attack it takes part in. Targeted strikes may not be made, nor do weapon coherence and MARs take effect, through the redirected attack. The attack otherwise follows all normal rules regarding to hit and AD modifiers from the attacking models to the redirecting model and from it to the target enemy model.

Designation		HEAVY CRUISER						
Name		Sulis						
Size class		Medium Capital						
Squadron size		2						
DR	CR	Mv	HP	CP	AP	PD	MN	
6	7	9"	4	4	3	4	0	
Points Cost		Shield Rating		Wings		Turn Limit		
60		I		0		0"		
Beam Weapons				10"	20"	30"	40"	
Turrets				5	6	3	-	
MARs								
Energy Locus (2), Secured Bulkheads, Vulnerable								
Upgrades						Points		
Select up to TWO from the following:								
0-1: Give the Beam Weapons the Energy Transfer (1) MAR						+10		
0-1: +3" Command Distance						+5		

**Example:** In this example an Aquan Heavy Carrier moves to within 18" of a Sulis Heavy Cruiser. It fires its Fore beam weapon at the Sulis for 11 AD.

The Commander is feeling lucky, so elects to add 2AD to the roll, and makes a Command Check needing 2 Successes. Fortune favours the brave and the dice rolls are successful, so the total goes from 11 AD to 13 AD.

The Sulis is within 20" of the Directorate Battleship with a clear Line of Sight and the attack can therefore take place. This counts as the once per Turn use for the Aquan player.

# HEAVY CRUISER

## Namazu and Tsunami Class

Designation		HEAVY CRUISER					
Name		Namazu, Tsunami

Select up to ONE from the following:								
0-I: Gain the Difficult Target MAR						+5		
0-I: +I Shield						Free		
Upgrades						Points		
Gain the Energy Transfer (Beam, I) MAR						+5		

### Accompaniment Rules:

The following rules are currently being tested by our Firestorm Focus Group, but we would very much like our player community to try out the following Accompaniment Rules for the ships on Pages 18 & 19:

- Add Accompaniment option to Oannes Carrier: 0-1 Carcinus, 0-2 Ladons.
- Add Accompaniment option to Charybdis & Triton Carrier: 0-1 Carcinus, 0-2 Ladons.
- Add Accompaniment option to single Orca: 0-1 Ladon.

### Mixed Cruiser Squadrons

Up to one Cruiser in a Cruiser Squadron may instead be a Heavy Cruiser or an Escort Carrier, for the Points Cost listed in the relevant Statistics profile. Up to one Light Cruiser in a Light Cruiser Squadron may instead be a Standard Cruiser, Gunship or an Escort Carrier, again for the relevant Points Cost. In all cases, the minimum Squadron requirements must still be filled with standard Cruisers or Light Cruisers, and the Squadron cannot contain more models than its maximum Squadron Size.

# CRUISER

**FIRESTORM  
ARMADA**

# FLEET MANUAL

# SORYLIAN COLLECTIVE

WARRIORS OF KERENDER

As described in the Fleet Building chapter of the Core rulebook, one of the first things you will need to do before beginning a game of Firestorm Armada is construct your Fleet.

To build a Sorylian Collective Fleet, you will use the Fleet Building chapter in the rulebook in conjunction with the information presented in here, specifically the Composition Tables below and the Statistics Profiles listed on the following pages.

Each possible size of Fleet (Patrol Fleet, Battle Fleet or Grand Fleet) as determined by Maximum Fleet Value (MFV) has its own Composition Table. This table describes how many Squadrons of each Designation of model can be taken in the Fleet, including any allied choices. For example, a Patrol Fleet can contain up to two Squadrons with the Cruiser Designation.

Consult each model's Statistic Profile to find its Designation. You will notice that some of the Designations listed below cannot be found in the following Statistics pages. This is to accommodate both additional models that will follow in the future, and those available to Alliance Fleets as discussed on the next page.

The Composition Tables also divide the available Designations into Tiers. Each Tier has a minimum and a maximum limit, on top of the restrictions per designation. For example, in a Patrol Fleet you can field up to two Tier 1 Squadrons, chosen from up to 1 Battleship, up to 2 Carriers and so on.

Which Tier a Squadron falls into also affects how the Squadron influences your Battle Log, as described in the Victory Conditions chapter of the rulebook.

## Patrol Fleets

If the agreed MFV is 800 Points or less, your Fleet is classed as a Patrol Fleet. You may select your Squadrons from the following list:

Tier 1 Between 1 and 2 Squadrons, chosen from the following:	
Up to 1	Battleship
Up to 2	Carriers
Up to 1	Heavy Cruiser Squadron
Up to 1	Battlecruiser
Up to 1	Battle Station

Tier 2 Between 1 and 2 Squadrons, chosen from the following:	
Up to 2	Cruiser Squadrons
Up to 2	Light Cruiser Squadrons
Up to 1	Destroyer Squadron
Up to 1	Assault or Torpedo Cruiser Squadron
Up to 1	Gunship Squadron
Up to 1	Defence Platform Squadron

Tier 3 Between 1 and 3 Squadrons, chosen from the following:	
Up to 3	Frigate Squadrons
Up to 2	Light Frigate Squadrons
Up to 2	Corvette Squadrons

**Important Note:** In a Patrol Fleet, the Battlecruiser's Squadron Size is reduced to 1.

## Battle Fleets

If the agreed MFV is between 801 and 1200 Points, your Fleet is classed as a Battle Fleet. You may select your Squadrons from the following list:

Tier 1 Between 1 and 3 Squadrons, chosen from the following:	
Up to 2	Battleships
Up to 3	Carriers
Up to 1	Dreadnought
Up to 1	Battle Carrier
Up to 1	Battlecruiser Squadron
Up to 1	Battle Station

Tier 2 Between 1 and 3 Squadrons, chosen from the following:	
Up to 3	Cruiser Squadrons
Up to 2	Heavy Cruiser Squadrons
Up to 1	Destroyer Squadron
Up to 2	Assault or Torpedo Cruiser Squadrons
Up to 2	Gunship Squadrons
Up to 1	Defence Platform Squadron

Tier 3 Between 2 and 4 Squadrons, chosen from the following:	
Up to 2	Light Cruiser Squadrons
Up to 3	Frigate Squadrons
Up to 2	Light Frigate Squadrons
Up to 2	Corvette Squadrons

## Grand Fleets

If the agreed MFV is between 1201 and 2000 Points, your Fleet is classed as a Grand Fleet. You may select your Squadrons from the following list:

Tier 1	
Between 2 and 4 Squadrons, chosen from the following:	
Up to 3	Battleships
Up to 4	Carriers
Up to 2	Dreadnoughts
Up to 1	Battle Carrier
Up to 2	Battlecruiser Squadrons
Up to 1	Leviathan
Up to 2	Battle Stations

Tier 2	
Between 2 and 4 Squadrons, chosen from the following:	
Up to 4	Cruiser Squadrons
Up to 2	Heavy Cruiser Squadrons
Up to 3	Destroyer Squadrons
Up to 3	Assault or Torpedo Cruiser Squadrons
Up to 3	Gunship Squadrons
Up to 2	Defence Platform Squadrons

Tier 3	
Between 3 and 5 Squadrons, chosen from the following:	
Up to 3	Light Cruiser Squadrons
Up to 4	Frigate Squadrons
Up to 3	Light Frigate Squadrons
Up to 4	Corvette Squadrons

## Mighty Armadas

If the agreed MFV is in excess of 2000 Points the force is divided into separate Fleets, each with its own Admiral, TACs, *etc.* A force of between 2001 and 2800 Points is formed into one Grand Fleet and one Patrol Fleet, while a force of between 2801 and 3200 Points is divided into one Grand Fleet and one Battle Fleet and so on.

Provided the minimum requirements for each Fleet can be met, you may divide your MFV between the Fleets as you see fit. For example, a 2300 Point force could contain a 1900 Point Grand Fleet and a 400 Point Patrol Fleet, or a 1500 Point Grand Fleet and an 800 Point Patrol Fleet.

## Alliance Fleets

In addition to selecting Squadrons of Sorylian Collective models, up to one quarter of your Fleet's Maximum Fleet Value (rounded down) may be chosen from other races and

factions within the Kurak Alliance, including vessels from the Aquan Prime and Terran Alliance, and any of those found within the Alliance of Kurak Fleet Manual. This turns your Fleet into an 'Alliance Fleet'.

Your Fleet's minimum required Squadrons from each Tier **MUST** be from the Sorylian Collective, and your Fleet Admiral must be placed on a Tier 1 Sorylian Collective model.

Each Squadron uses the Command Distance of its race or faction and your Fleet's Fleet Tactics Bonus is the **LOWEST** from the races which make up your Fleet. Finally, an Alliance Fleet cannot take Tactical Ability Cards listed as 'Sorylian Collective Only'; only General or Alliance of Kurak cards may be used.

Otherwise, each Squadron is chosen as normal, using up the relevant Squadron selection for its Tier and paying the required Points Cost, with all Upgrades, Hard Points and accompaniments available for purchase.

## Allied Squadrons

A single Squadron can only contain models from ONE race or faction. For example, a Squadron could not be comprised of two Sorylian Cruisers and an Aquan Heavy Cruiser.

The exception to this is where a Statistics Profile specifically lists models from another race or faction amongst its accompaniments. For example, a Sorylian Battleship can be accompanied by '0-3 Alliance of Kurak Escorts'. These may come from any race or faction within the Alliance of Kurak, for the listed points cost.

**Important Note:** Even if the only models selected from outside the Sorylian Collective are an Accompaniment to a Sorylian model, the Fleet is still considered an Alliance Fleet, and any associated penalties in Fleet Tactics Bonus and Tactical Ability Card selection apply.

## Natural Alliance

Certain races and factions within the Firestorm Galaxy will work together more readily than others, their goals or origin making them Natural Allies.

Sorylian Collective Fleets are Natural Allies with the Veydreth Tribes. One quarter of your MFV in a Sorylian Collective Fleet may be chosen from Veydreth Tribes models, in addition to the one quarter allowed in an Alliance Fleet. This means a full half of a Sorylian Fleet could be comprised of Veydreth Tribes models.

Additionally, if a Sorylian Fleet contains only Sorylian Collective and Veydreth Tribes models, 'Sorylian Collective Only' TACs may be chosen and used by all Squadrons in the Fleet.

SORYLIAN COLLECTIVE FLEET STATISTICS	
Fleet Tactics Bonus	I

This document is intended to provide you with the various statistics needed to use our spaceship models with the Firestorm Armada 2.0 rules. This Fleet Manual is what we refer to as a *'living document'*, meaning that as new models are created their statistics will be added and the document will expand.

Additionally, should any errata be found with printed materials they will be reflected in this document. As such, you should always use the statistics found in this document as the default statistics when you are playing Firestorm Armada. Please refer back to this download on a regular basis to ensure that you are playing with the latest version of statistics.

# BATTLE STATION

## Phalanx Class

**Important Note:** Installations, such as the Battle Station shown on this page, have two Movement values. The first is the distance that the Installation can move whilst under a player's control, just like any other model. The second is the distance that it will move during the End Phase of each Turn if the rules for Moving Terrain are being used. This movement is conducted in the same manner as other Terrain Movement.

Designation		BATTLE STATION

Gain the Pack Hunters MAR						+5	
Give the Kinetic Weapons the Decimator Warheads MAR						+5	

### Accompaniment Rules:

The following rules are currently being tested by our Firstorm Focus Group, but we would very much like our player community to try out the following Accompaniment Rules for the ships on Pages 14 & 15:

- Add Accompaniment option to the Falx & Swordbreaker Battleships: 0-3 Flechette Light Frigates
- Add Accompaniment option to a single Hasta Battlecruiser: 0-2 Lucern Light Cruisers
- Add Accompaniment option to a single Amentum Battlecruiser: 0-1 Harvester Gunship
- Add Accompaniment option to the Morning Star & Xiphos Carriers: 0-2 Harvester Gunships

### Mixed Cruiser Squadrons

Up to one Cruiser in a Cruiser Squadron may instead be a Heavy Cruiser or an Escort Carrier, for the Points Cost listed in the relevant Statistics profile. Up to one Light Cruiser in a Light Cruiser Squadron may instead be a Standard Cruiser, Gunship or an Escort Carrier, again for the relevant Points Cost. In all cases, the minimum Squadron requirements must still be filled with standard Cruisers or Light Cruisers, and the Squadron cannot contain more models than its maximum Squadron Size.

**FIRESTORM  
ARMADA**

# FLEET MANUAL

# TERRAN ALLIANCE

GUARDIANS OF THE CHARTER

As described in the Fleet Building chapter of the rulebook, one of the first things you will need to do before beginning a game of Firestorm Armada is construct your Fleet.

To build a Terran Alliance Fleet, you will use the Fleet Building chapter in the rulebook in conjunction with the information presented here, specifically the Composition Tables below and the Statistics Profiles listed on the following pages.

Each possible size of Fleet (Patrol Fleet, Battle Fleet or Grand Fleet) as determined by Maximum Fleet Value (MFV) has its own Composition Table. This table describes how many Squadrons of each Designation of model can be taken in the Fleet, including any allied choices. For example, a Patrol Fleet can contain up to two Squadrons with the Cruiser Designation.

## Patrol Fleets

If the agreed MFV is 800 Points or less, your Fleet is classed as a Patrol Fleet. You may select your Squadrons from the following list:

Tier 1 Between 1 and 2 Squadrons, chosen from the following:	
Up to 1	Battleship
Up to 2	Carriers
Up to 1	Heavy Cruiser Squadron
Up to 1	Battlecruiser
Up to 1	Battle Station

Tier 2 Between 1 and 2 Squadrons, chosen from the following:	
Up to 2	Cruiser Squadrons
Up to 1	Destroyer Squadron
Up to 2	Light Cruiser Squadrons
Up to 1	Assault or Torpedo Cruiser Squadron
Up to 1	Shield Cruiser Squadron
Up to 1	Gunship Squadron
Up to 1	Defence Platform Squadron

Tier 3 Between 1 and 3 Squadrons, chosen from the following:	
Up to 3	Frigate Squadrons
Up to 2	Light Frigate Squadrons
Up to 2	Corvette Squadrons

**Important Note:** In a Patrol Fleet, the Battlecruiser's Squadron Size is reduced to 1.

Consult each model's Statistic Profile to find its Designation. You will notice that some of the Designations listed below cannot be found in the following Statistics pages. This is to accommodate both additional models that will follow in the future, and those available to Alliance Fleets as discussed on the next page.

The Composition Tables also divide the available Designations into Tiers. Each Tier has a minimum and a maximum limit, on top of the restrictions per designation. For example, in a Patrol Fleet you can field up to two Tier 1 Squadrons, chosen from up to 1 Battleship, up to 2 Carriers and so on.

Which Tier a Squadron falls into also affects how the Squadron influences your Battle Log, as described in the Victory Conditions chapter of the rulebook.

## Battle Fleets

If the agreed MFV is between 801 and 1200 Points, your Fleet is classed as a Battle Fleet. You may select your Squadrons from the following list:

Tier 1 Between 1 and 3 Squadrons, chosen from the following:	
Up to 2	Battleships
Up to 3	Carriers
Up to 1	Dreadnought
Up to 1	Battle Carrier
Up to 1	Battlecruiser Squadron
Up to 1	Battle Station

Tier 2 Between 1 and 3 Squadrons, chosen from the following:	
Up to 3	Cruiser Squadrons
Up to 2	Heavy Cruiser Squadrons
Up to 2	Destroyer Squadrons
Up to 2	Assault or Torpedo Cruiser Squadrons
Up to 1	Shield Cruiser Squadron
Up to 1	Gunship Squadron
Up to 1	Defence Platform Squadron

Tier 3 Between 2 and 4 Squadrons, chosen from the following:	
Up to 4	Frigate Frigate Squadrons
Up to 2	Light Frigate Squadrons
Up to 3	Corvette Squadrons
Up to 2	Light Cruiser Squadrons

## Grand Fleets

If the agreed MFV is between 1201 and 2000 Points, your Fleet is classed as a Grand Fleet. You may select your Squadrons from the following list:

Tier 1 Between 2 and 4 Squadrons, chosen from the following:	
Up to 3	Battleships
Up to 4	Carriers
Up to 2	Dreadnoughts
Up to 2	Battle Carriers
Up to 2	Battlecruiser Squadrons
Up to 1	Leviathan
Up to 2	Battle Stations

Tier 2 Between 2 and 4 Squadrons, chosen from the following:	
Up to 4	Cruiser Squadrons
Up to 3	Heavy Cruiser Squadrons
Up to 3	Destroyer Squadrons
Up to 3	Assault or Torpedo Cruiser Squadrons
Up to 2	Shield Cruiser Squadrons
Up to 2	Gunship Squadrons
Up to 2	Defence Platform Squadrons

Tier 3 Between 3 and 5 Squadrons, chosen from the following:	
Up to 5	Frigate Squadrons
Up to 3	Light Frigate Squadrons
Up to 4	Corvette Squadrons
Up to 3	Light Cruiser Squadrons

## Mighty Armadas

If the agreed MFV is in excess of 2000 Points the force is divided into separate Fleets, each with its own Admiral, TACs, *etc.* A force of between 2001 and 2800 Points is formed into one Grand Fleet and one Patrol Fleet, while a force of between 2801 and 3200 Points is divided into one Grand Fleet and one Battle Fleet and so on.

Provided the minimum requirements for each Fleet can be met, you may divide your MFV between the Fleets as you see fit. For example, a 2300 Point force could contain a 1900 Point Grand Fleet and a 400 Point Patrol Fleet, or a 1500 Point Grand Fleet and an 800 Point Patrol Fleet.

## Alliance Fleets

In addition to selecting Squadrons of Terran Alliance models, up to one quarter of your Fleet's Maximum Fleet Value (rounded down) may be chosen from other races and factions within the Kurak Alliance, including vessels from the Aquan Prime and Sorylian Collective, and any of those found within the Kurak Alliance Fleet Manual. This turns your Fleet into an 'Alliance Fleet'.

Your Fleet's minimum required Squadrons from each Tier **MUST** be from the Terran Alliance, and your Fleet Admiral must be placed on a Tier 1 Terran Alliance model.

Each Squadron uses the Command Distance of its race or faction and your Fleet's Fleet Tactics Bonus is the **LOWEST** from the races which make up your Fleet. Finally, an Alliance Fleet cannot take Tactical Ability Cards listed as 'Terran Alliance Only'; only General or Alliance of Kurak cards may be used.

Otherwise, each Squadron is chosen as normal, using up the relevant Squadron selection for its Tier and paying the required Points Cost, with all Upgrades, Hard Points and accompaniments available for purchase.

### Allied Squadrons

A single Squadron can only contain models from ONE race or faction. For example, a Squadron could not be comprised of two Terran Cruisers and an Aquan Heavy Cruiser.

The exception to this is where a Statistics Profile specifically lists models from another race or faction amongst its accompaniments. For example, a Terran Battleship can be accompanied by '0-3 Alliance of Kurak Escorts'. These may come from any race or faction within the Alliance of Kurak, for the listed points cost.

**Important Note:** Even if the only models selected from outside the Terran Alliance are an Accompaniment to a Terran model, the Fleet is still considered an Alliance Fleet, and any associated penalties in Fleet Tactics Bonus and Tactical Ability Card selection apply.

### Natural Alliance

Certain races and factions within the Firestorm Galaxy will work together more readily than others, their goals or origin making them Natural Allies.

Terran Alliance Fleets are Natural Allies with Hawker Industries. One quarter of your MFV in a Terran Alliance Fleet may be chosen from Hawker Industries models, in addition to the one quarter allowed in an Alliance Fleet. This means a full half of a Terran Fleet could be comprised of Hawker Industries models.

Additionally, if a Terran Fleet contains only Terran Alliance and Hawker Industries models, 'Terran Alliance Only' TACs may be chosen and used by all Squadrons in the Fleet.

This document is intended to provide you with the various statistics needed to use our spaceship models with the Firestorm Armada 2.0 rules. This Fleet Manual is what we refer to as a *'living document'*, meaning that as new models are created their statistics will be added and the document will expand.

Additionally, should any errata be found with printed materials they will be reflected in this document. As such, you should always use the statistics found in this document as the default statistics when you are playing Firestorm Armada. Please refer back to this download on a regular basis to ensure that you are playing with the latest version of statistics.

### Accompaniment Rules:

The following rules are currently being tested by our Firestorm Focus Group, but we would very much like our player community to try out the following Accompaniment Rules for the ships on Pages 14 & 15:

- Add Accompaniment option to the Ares & Zenith Carriers: 0-2 Perseus Light Cruisers.
- Add Accompaniment option to single Marshall Class Battlecruiser: 0-1 Harpoon Torpedo Cruisers.
- Add Accompaniment option to Tyrant Battleship: 0-2 Wayfarer Light Frigates.

### Mixed Cruiser Squadrons

Up to one Cruiser in a Cruiser Squadron may instead be a Heavy Cruiser or an Escort Carrier, for the Points Cost listed in the relevant Statistics profile. Up to one Light Cruiser in a Light Cruiser Squadron may instead be a Standard Cruiser, Gunship or an Escort Carrier, again for the relevant Points Cost. In all cases, the minimum Squadron requirements must still be filled with standard Cruisers or Light Cruisers, and the Squadron cannot contain more models than its maximum Squadron Size.

In addition to the three major races which make up the Alliance of Kurak; the Terran Alliance, the Sorylian Collective and the Aquan Prime, numerous smaller factions joined the Alliance to benefit from the mutual protection it offered or for a chance to strike back at hated enemies within the Zenian League. The most powerful of these factions have contributed significant numbers of ships to the war effort, either in fully formed fleets, or as auxiliaries within larger formations. Each of these factions has their own motivations within the Alliance's cause, and their own unique vessels and tactics that they bring to battle.

Although officially part of the Terran Alliance, the ancient ship building firm Hawker Industries are providing such a weight of military grade vessels to the conflict as to be considered a faction in their own right. Production rates across their extensive facilities has increased dramatically as they churn out vessels bound for the front line. As firm allies of both the Aquan and Terran dominions, the Terquai colonies were quick to offer their sturdy vessels and elite marines. Having suffered numerous atrocities at the hands of the perfidious Directorate, they are keen for revenge.

The brutal, war hungry Veydreth, or the 'Star Dragons' as they are often known, joined the Alliance without hesitation, eager for the spoils they could seize from the conflict. Fighting for their survival in a merciless galaxy, the bird-like Xelocians and vengeful Ryushi both pledged the might of their stellar navies. With searing laser weapons and massed flights of close range craft, both races have struck hard against the Zenian forces rampaging through the Storm Zone. Finally, the mysterious Tarakian Conclaves joined the fight, determined to stabilise the galactic sector, through force of arms if necessary.

## Fleet Building

The models in this Fleet Manual can be used in two different ways. They can be taken alongside models from the Terran Alliance, Aquan Prime or Sorylian Collective as part of an Alliance Fleet, or they can be fielded as a dedicated Kurak Support Fleet which will only contain models from within this Manual.

The rules for building Alliance Fleets so that these models can be used alongside the Terran Alliance, Aquan Prime or Sorylian Collective are given in their respective Fleet Manuals. Using these, with the Statistics Profiles presented here and the Fleet Building chapter of the rulebook you will be able to create a versatile and highly effective fighting force.

The following rules and Composition Tables apply to Kurak Support Fleets.

### Kurak Support Fleets

Unlike Alliance Fleets, Kurak Support Fleets do not contain any models from the three major races, instead, they are comprised entirely of models from within this Fleet Manual.

As you will see when looking through the following Statistics Profiles, the models within this Manual are grouped into different factions; Hawker Industries, the Ryushi, the Tarakians, the Terquai, the Veydreth and the Xelocians. To construct a Kurak Support Fleet, you first need to select one of these to be your Core Faction.

Your Fleet's minimum required Squadrons from each Tier MUST be chosen from the models available to this Faction, and your Fleet Admiral must be placed on a Tier 1 model belonging to this Faction.

Apart from this, you may fill out the remainder of your Fleet using the models available either to your Core Faction, or the other factions within this Manual. The Fleet follows the normal Fleet Building rules and procedure as laid out in the Fleet Building section of the rulebook, with the Composition Tables found on the following page governing how many of each type of Squadron can be fielded, and which Tiers they fall into.

As with the standard and Alliance Fleets, which Composition Table you should use is determined by the Maximum Fleet Value (MFV) you have agreed with your opponent.

### Allied Squadrons

Although a Kurak Support Fleet will often contain Squadrons from several different factions, a single Squadron can only contain models from ONE race or faction. For example, a Squadron could not be comprised of two Hawker Industries Cruisers and a Veydreth Heavy Cruiser.

The exception to this is where a Statistics Profile specifically lists models from another race or faction amongst its accompaniments. For example, a Hawker Industries Battleship can be accompanied by '0-3 Alliance of Kurak Escorts'. These may come from any race or faction within the Alliance of Kurak, including the Terran Alliance, Aquan Prime or Sorylian Collective, for the listed points cost. These are the only models from these major races allowed within a Kurak Support Fleet.

### Fleet Statistics and Tactical Ability Cards

Kurak Support Fleets may choose their Tactical Ability Cards from the general or Alliance of Kurak lists.

Your Fleet Tactics Bonus is that of your Core Faction, however each Squadron has the Command Distance of its own Faction.

For example, a Kurak Support Fleet with Hawker Industries as its Core Faction will have a Fleet Tactics Bonus of 3 and the Hawker Industries Squadrons within the Fleet will have a Command Distance of 6". However, a Terquai Squadron joining the Fleet will keep the Terquai Command Distance of 7".

## Patrol Fleets

If the agreed MFV is 800 Points or less, your Fleet is classed as a Patrol Fleet. You may select your Squadrons from the following list:

Tier 1 Between 1 and 2 Squadrons, chosen from the following:	
Up to 1	Battleship
Up to 2	Carriers
Up to 1	Battlecruiser
Up to 1	Gunship Squadron
Up to 1	Heavy Cruiser Squadron
Up to 1	Assault Carrier

Tier 2 Between 1 and 2 Squadrons, chosen from the following:	
Up to 2	Cruiser Squadrons
Up to 1	Destroyer Squadron
Up to 2	Assault or Torpedo Cruiser Squadrons

Tier 3 Between 1 and 3 Squadrons, chosen from the following:	
Up to 2	Frigate Squadrons
Up to 2	Corvette Squadrons

## Battle Fleets

If the agreed MFV is between 801 and 1200 Points, your Fleet is classed as a Battle Fleet. You may select your Squadrons from the following list:

Tier 1 Between 1 and 3 Squadrons, chosen from the following:	
Up to 2	Battleships
Up to 1	Battle Carrier
Up to 1	Battlecruiser Squadron
Up to 1	Dreadnought
Up to 3	Carriers
Up to 2	Assault Carriers

Tier 2 Between 1 and 3 Squadrons, chosen from the following:	
Up to 3	Cruiser Squadrons
Up to 2	Heavy Cruiser Squadrons
Up to 1	Gunship Squadron
Up to 1	Destroyer Squadron
Up to 3	Assault or Torpedo Cruiser Squadrons

Tier 3 Between 2 and 4 Squadrons, chosen from the following:	
Up to 3	Frigate Squadrons
Up to 3	Corvette Squadrons

## Grand Fleets

If the agreed MFV is between 1201 and 2000 Points, your Fleet is classed as a Grand Fleet. You may select your Squadrons from the following list:

Tier 1 Between 2 and 4 Squadrons, chosen from the following:	
Up to 3	Battleships
Up to 4	Carriers
Up to 2	Battlecruiser Squadrons
Up to 2	Dreadnoughts
Up to 2	Battle Carriers
Up to 3	Assault Carriers

Tier 2 Between 2 and 4 Squadrons, chosen from the following:	
Up to 4	Cruiser Squadrons
Up to 3	Heavy Cruiser Squadrons
Up to 2	Gunship Squadrons
Up to 2	Destroyer Squadrons
Up to 4	Assault or Torpedo Cruiser Squadrons

Tier 3 Between 3 and 5 Squadrons, chosen from the following:	
Up to 5	Frigate Squadrons
Up to 5	Corvette Squadrons

## Mighty Armadas

If the agreed MFV is in excess of 2000 Points the force is divided into separate Fleets, each with its own Admiral, TACs, *etc.* Each Fleet may also select a different Core Faction. A force of between 2001 and 2800 Points is formed into one Grand Fleet and one Patrol Fleet, while a force of between 2801 and 3200 Points is divided into one Grand Fleet and one Battle Fleet and so on.

Provided the minimum requirements for each Fleet can be met, you may divide your MFV between the Fleets as you see fit. For example, a 2300 Point force could contain a 1900 Point Grand Fleet and a 400 Point Patrol Fleet, or a 1500 Point Grand Fleet and an 800 Point Patrol Fleet.

**Important Note:** This document is intended to provide you with the various statistics needed to use our spaceship models with the Firestorm Armada 2.0 rules. This Fleet Manual is what we refer to as a '*living document*', meaning that as new models are created their statistics will be added and the document will expand.

Additionally, should any errata be found with printed materials they will be reflected in this document. As such, you should always use the statistics found in this document as the default statistics when you are playing Firestorm Armada. Please refer back to this download on a regular basis to ensure that you are playing with the latest version of statistics.

# ZENIAN LEAGUE

## The Pirates' Charter

When Chairman Rufus Rense and the Dindrenzi high command began preparing for their war, they ran into a pressing issue. Despite its great might, the Federation military did not have the strength to take on the Terrans and their allies alone.

Rufus and his more pragmatic commanders immediately recognised the need for allies of their own. However, many of their peers, including the powerful Church of the Dramos Angels, were strongly opposed to treating with aliens on anything like equal terms. However, ultimately, the Dindrenzi Legislature's respect for the Rense name and Rufus' judgement overcame their objections.

Even so, Rufus himself had reservations about some of his potential helpers. Although wary of the Directorate and the Relthoza Empire, the Chairman and his advisors were confident that their core pact would hold together provided the spoils of war were divided amicably.

With the assistance of Ervan Bas of the Directorate, Rufus managed to weld together a workable coalition. If nothing else, both leaders felt that the three greatest Reach powers standing together would intimidate

other dominions into cooperation!

The devious Kedorians were the first to join, ever looking for ways to increase their influence. The militaristic Illosians agreed to fight to hit out against their former home, the Aquan Sebrutan. Fierce Ba'Kash Clans, despite lacking an overall leader, flocked to the new coalition, anticipating great prosperity for their impoverished race.

The awesome Works Raptor, a power in its own right in the Directorate, contributed its deadly flotillas of warships and vicious new killing machines to what they saw as an immense live test. Finally, Dindrenzi trepidation was reduced with news that the alliance would be policed by the mighty Rense System Navy.

The new alliance was sealed by a top-secret conclave held on the Directorate's well-hidden capital planet Zenia. Unlike the Alliance of Kurak, the Zenian League is little more than a pirate's charter – in many cases, it has simply legitimised the rapacious activities that a number of its members had long pursued.

**FIRESTORM  
ARMADA**

# FLEET MANUAL

# DINDRENZI FEDERATION

THE CHILDREN OF IGNATIUS

As described in the Fleet Building chapter of the rulebook, one of the first things you will need to do before beginning a game of Firestorm Armada is construct your Fleet.

To build a Dindrenzi Federation Fleet you will use the Fleet Building chapter in the rulebook in conjunction with the information presented here, specifically the Composition Tables below and the Statistics Profiles listed on the following pages.

Each possible size of Fleet (Patrol Fleet, Battle Fleet or Grand Fleet) as determined by Maximum Fleet Value (MFV) has its own Composition Table. This table describes how many Squadrons of each Designation of model can be taken in the Fleet, including any allied choices. For example, a Patrol Fleet can contain up to two Squadrons with the Cruiser Designation.

## Patrol Fleets

If the agreed MFV is 800 Points or less, your Fleet is classed as a Patrol Fleet. You may select your Squadrons from the following list:

Tier 1 Between 1 and 2 Squadrons, chosen from the following:	
Up to 1	Battleship
Up to 2	Carriers
Up to 1	Gunship Squadron
Up to 1	Assault Carrier
Up to 1	Battlecruiser
Up to 1	Battle Station

Tier 2 Between 1 and 2 Squadrons, chosen from the following:	
Up to 1	Escort Carrier Squadron
Up to 2	Cruiser Squadrons
Up to 1	Destroyer Squadron
Up to 1	Assault or Torpedo Cruiser Squadron
Up to 1	Heavy Cruiser Squadron
Up to 1	Defence Platform Squadron

Tier 3 Between 1 and 3 Squadrons, chosen from the following:	
Up to 2	Frigate Squadrons
Up to 2	Light Frigate Squadrons
Up to 2	Corvette Squadrons

**Important Note:** In a Patrol Fleet, the Battlecruiser's Squadron Size is reduced to 1.

Consult each model's Statistic Profile to find its Designation. You will notice that some of the Designations listed below cannot be found in the following Statistics pages. This is to accommodate both additional models that will follow in the future, and those available to Alliance Fleets as discussed on the next page.

The Composition Tables also divide the available Designations into Tiers. Each Tier has a minimum and a maximum limit, on top of the restrictions per designation. For example, in a Patrol Fleet you can field up to two Tier 1 Squadrons, chosen from up to 1 Battleship, up to 2 Carriers and so on.

Which Tier a Squadron falls into also affects how the Squadron influences your Battle Log, as described in the Victory Conditions chapter of the 2.0 core rulebook.

## Battle Fleets

If the agreed MFV is between 801 and 1200 Points, your Fleet is classed as a Battle Fleet. You may select your Squadrons from the following list:

Tier 1 Between 1 and 3 Squadrons, chosen from the following:	
Up to 2	Battleships
Up to 3	Carriers
Up to 1	Dreadnought
Up to 1	Battle Carrier
Up to 1	Assault Carrier
Up to 1	Battlecruiser Squadron
Up to 1	Battle Station

Tier 2 Between 1 and 3 Squadrons, chosen from the following:	
Up to 2	Escort Carrier Squadrons
Up to 3	Cruiser Squadrons
Up to 2	Heavy Cruiser Squadrons
Up to 1	Destroyer Squadron
Up to 1	Assault or Torpedo Cruiser Squadron
Up to 1	Gunship Squadron
Up to 1	Defence Platform Squadron

Tier 3 Between 2 and 3 Squadrons, chosen from the following:	
Up to 3	Frigate Squadrons
Up to 2	Light Frigate Squadrons
Up to 2	Corvette Squadrons

## Grand Fleets

If the agreed MFV is between 1201 and 2000 Points, your Fleet is classed as a Grand Fleet. You may select your Squadrons from the following list:

Tier 1	
Between 2 and 4 Squadrons, chosen from the following:	
Up to 3	Battleships
Up to 4	Carriers
Up to 2	Dreadnoughts
Up to 2	Battle Carriers
Up to 2	Assault Carriers
Up to 2	Battlecruiser Squadrons
Up to 1	Leviathan
Up to 2	Battle Stations

Tier 2	
Between 2 and 4 Squadrons, chosen from the following:	
Up to 3	Escort Carrier Squadrons
Up to 4	Cruiser Squadrons
Up to 3	Heavy Cruiser Squadrons
Up to 2	Destroyer Squadrons
Up to 2	Assault or Torpedo Cruiser Squadrons
Up to 2	Gunship Squadrons
Up to 2	Defence Platform Squadrons

Tier 3	
Between 3 and 5 Squadrons, chosen from the following:	
Up to 5	Frigate Squadrons
Up to 3	Light Frigate Squadrons
Up to 4	Corvette Squadrons

## Mighty Armadas

If the agreed MFV is in excess of 2000 Points the force is divided into separate Fleets, each with its own Admiral, TACs, *etc.* A force of between 2001 and 2800 Points is formed into one Grand Fleet and one Patrol Fleet, while a force of between 2801 and 3200 Points is divided into one Grand Fleet and one Battle Fleet and so on.

Provided the minimum requirements for each Fleet can be met, you may divide your MFV between the Fleets as you see fit. For example, a 2300 Point force could contain a 1900 Point Grand Fleet and a 400 Point Patrol Fleet, or a 1500 Point Grand Fleet and an 800 Point Patrol Fleet.

## Alliance Fleets

In addition to selecting Squadrons of Dindrenzi Federation models, up to one quarter of your Fleet's Maximum Fleet Value (rounded down) may be chosen from other races and

factions within the Zenian League, including vessels from the Directorate and Relthoza, and any of those found within the Zenian League Fleet Manual. This turns your Fleet into an 'Alliance Fleet'.

Your Fleet's minimum required Squadrons from each Tier **MUST** be from the Dindrenzi Federation, and your Fleet Admiral must be placed on a Tier 1 Dindrenzi Federation model.

Each Squadron uses the Command Distance of its race or faction and your Fleet's Fleet Tactics Bonus is the **LOWEST** from the races which make up your Fleet. Finally, an Alliance Fleet cannot take Tactical Ability Cards listed as 'Dindrenzi Federation Only'; only General or Zenian League cards may be used.

Otherwise, each Squadron is chosen as normal, using up the relevant Squadron selection for its Tier and paying the required Points Cost, with all Upgrades, Hard Points and accompaniments available for purchase.

### Allied Squadrons

A single Squadron can only contain models from ONE race or faction. For example, a Squadron could not be comprised of two Dindrenzi Cruisers and a Directorate Heavy Cruiser.

The exception to this is where a Statistics Profile specifically lists models from another race or faction amongst its accompaniments. For example, a Dindrenzi Battleship can be accompanied by '0-3 Zenian League Escorts'. These may come from any race or faction within the Zenian League, for the listed points cost.

**Important Note:** Even if the only models selected from outside the Dindrenzi Federation are an Accompaniment to a Dindrenzi model, the Fleet is still considered an Alliance Fleet, and any associated penalties in Fleet Tactics Bonus and Tactical Ability Card selection apply.

### Natural Alliance

Certain races and factions within the Firestorm Galaxy will work together more readily than others, their goals or origin making them Natural Allies.

Dindrenzi Federation Fleets are Natural Allies with the Rense System Navy. One quarter of your MFV in a Dindrenzi Federation Fleet may be chosen from Rense System Navy models, in addition to the one quarter allowed in an Alliance Fleet. This means a full half of a Dindrenzi Fleet could be comprised of Rense System Navy models.

Additionally, if a Dindrenzi Fleet contains only Dindrenzi Federation and Rense System Navy models, 'Dindrenzi Federation Only' TACs may be chosen. and used by all Squadrons in the Fleet.

This document is intended to provide you with the various statistics needed to use our spaceship models with the Firestorm Armada 2.0 rules. This Fleet Manual is what we refer to as a *'living document'*, meaning that as new models are created their statistics will be added and the document will expand.

Additionally, should any errata be found with printed materials they will be reflected in this document. As such, you should always use the statistics found in this document as the default statistics when you are playing Firestorm Armada. Please refer back to this download on a regular basis to ensure that you are playing with the latest version of statistics.

Aft				7	14	10	6
Torpedo Weapons				12"	24"	36"	48"
Fore				9	9	9	9
Aft				9	9	9	9
MARs							
Ablative Plating, Manoeuvrable, Minefields (3, 6 AD), No FSD, Protected Systems							
Hardpoints						Points	
Select up to ONE from the following:							
0-I: +2 PD						Free	
0-I: +3 Wing Capacity						+5	
0-I: Remove the Ablative Plating MAR						+15	
Upgrades						Points	
Gain the Deck Crews MAR						+5	

**Important Note:** Installations, such as the Battle Station shown on this page, have two Movement values. The first is the distance that the Installation can move whilst under a player's control, just like any other model. The second is the distance that it will move during the End Phase of each Turn if the rules for Moving Terrain are being used. This movement is conducted in the same manner as other Terrain Movement.

# BATTLECRUISER

## Cataphract Class

Designation		BATTLECRUISER

MARs							
Difficult Target							
Upgrades						Points	
Gain the Scout MAR						+5	

# CRUISER

## Velites Class

### Accompaniment Rules:

The following rules are currently being tested by our Firestorm Focus Group, but we would very much like our player community to try out the following Accompaniment Rules for the ships on Pages 14 & 15:

- Add Accompaniment option to a Praetorian Battleship: 0-1 Decurion Escort Carrier
- Add Accompaniment option to a Nausicaa Battleship: 0-1 Decurion Escort Carrier
- Add Accompaniment to a Legion Assault carrier: 0-1 Decurion Escort Carrier
- Add Accompaniment to the Claymore & Falchion Carriers: 0-2 Decurion, 0-2 Velites Cruiser

Designation		CRUISER					
Name		Velites					
Size class		Medium Capital					
Squadron size		2-3					
DR	CR	Mv	HP	CP	AP	PD	MN
4	8	9"	4	3	2	2	0
Points Cost		Shield Rating		Wings		Turn Limit	
55		0		0		2"	
Primary Weapons				8"	16"	24"	32"
Gunrack				5	7	2	-
Fore (Fixed)				4	2	-	-
Kinetic Weapons				12"	24"	36"	48"
Fore (Fixed)				6	8	5	4
MARs							
Ablative Plating							
Hardpoints						Points	
Select up to ONE from the following:							
0-I: +2" Mv						+5	
0-I: Change the Primary Weapons to Scatter Weapons						+5	
Upgrades						Points	
Gain the Secured Bulkheads MAR						+5	

### Mixed Cruiser Squadrons

Up to one Cruiser in a Cruiser Squadron may instead be a Heavy Cruiser or an Escort Carrier, for the Points Cost listed in the relevant Statistics profile. Up to one Light Cruiser in a Light Cruiser Squadron may instead be a Standard Cruiser, Gunship or an Escort Carrier, again for the relevant Points Cost. In all cases, the minimum Squadron requirements must still be filled with standard Cruisers or Light Cruisers, and the Squadron cannot contain more models than its maximum Squadron Size.

# ASSAULT CARRIER

## Legion Class

Designation		ASSAULT CARRIER *					
Name		Legion

0-1: +1 PD						+5	

**FIRESTORM  
ARMADA**

# FLEET MANUAL

# DIRECTORATE

SCOURGE OF THE OUTER REACH

**SPARTAN  
GAMES**

As described in the Fleet Building chapter of the rulebook, one of the first things you will need to do before beginning a game of Firestorm Armada is construct your Fleet.

To build a Directorate Fleet, you will use the Fleet Building chapter in the rulebook in conjunction with the information presented here, specifically the Composition Tables below and the Statistics Profiles listed on the following pages.

Each possible size of Fleet (Patrol Fleet, Battle Fleet or Grand Fleet) as determined by Maximum Fleet Value (MFV) has its own Composition Table. This table describes how many Squadrons of each Designation of model can be taken in the Fleet, including any allied choices. For example, a Patrol Fleet can contain up to two Squadrons with the Cruiser Designation.

## Patrol Fleets

If the agreed MFV is 800 Points or less, your Fleet is classed as a Patrol Fleet. You may select your Squadrons from the following list:

Tier 1 Between 1 and 2 Squadrons, chosen from the following:	
Up to 1	Battleship
Up to 2	Carriers
Up to 1	Assault Carrier
Up to 1	Heavy Cruiser
Up to 1	Battlecruiser
Up to 1	Battle Station

Tier 2 Between 1 and 2 Squadrons, chosen from the following:	
Up to 1	Escort Carrier Squadron
Up to 2	Cruiser Squadrons
Up to 2	Light Cruiser Squadrons
Up to 1	Destroyer Squadron
Up to 1	R&D Cruiser Squadron
Up to 1	Assault or Torpedo Cruiser Squadron
Up to 1	Gunship Squadron
Up to 1	Defence Platform Squadron

Tier 3 Between 1 and 3 Squadrons, chosen from the following:	
Up to 3	Frigate Squadrons
Up to 2	Light Frigate Squadrons
Up to 2	Drone Squadrons
Up to 2	Corvette Squadrons

**Important Note:** In a Patrol Fleet, the Battlecruiser's Squadron Size is reduced to 1.

Consult each model's Statistic Profile to find its Designation. You will notice that some of the Designations listed below cannot be found in the following Statistics pages. This is to accommodate both additional models that will follow in the future, and those available to Alliance Fleets as discussed on the next page.

The Composition Tables also divide the available Designations into Tiers. Each Tier has a minimum and a maximum limit, on top of the restrictions per designation. For example, in a Patrol Fleet you can field up to two Tier 1 Squadrons, chosen from up to 1 Battleship, up to 2 Carriers and so on.

Which Tier a Squadron falls into also affects how the Squadron influences your Battle Log, as described in the Victory Conditions chapter of the rulebook.

## Battle Fleets

If the agreed MFV is between 801 and 1200 Points, your Fleet is classed as a Battle Fleet. You may select your Squadrons from the following list:

Tier 1 Between 1 and 3 Squadrons, chosen from the following:	
Up to 2	Battleships
Up to 3	Carriers
Up to 1	Dreadnought
Up to 1	Battle Carrier
Up to 2	Assault Carriers
Up to 1	Battlecruiser Squadron
Up to 1	Battle Station

Tier 2 Between 1 and 3 Squadrons, chosen from the following:	
Up to 2	Escort Carrier Squadrons
Up to 3	Cruiser Squadrons
Up to 3	Light Cruiser Squadrons
Up to 1	Heavy Cruiser Squadron
Up to 2	Destroyer Squadrons
Up to 2	Assault or Torpedo Cruiser Squadrons
Up to 1	Gunship Squadron
Up to 1	R&D Cruiser Squadron
Up to 1	Defence Platform Squadron

Tier 3 Between 2 and 4 Squadrons, chosen from the following:	
Up to 3	Frigate Squadrons
Up to 2	Light Frigate Squadrons
Up to 2	Drone Squadrons
Up to 2	Corvette Squadrons

## Grand Fleets

If the agreed MFV is between 1201 and 2000 Points, your Fleet is classed as a Grand Fleet. You may select your Squadrons from the following list:

Tier 1	
Between 2 and 4 Squadrons, chosen from the following:	
Up to 3	Battleships
Up to 4	Carriers
Up to 2	Dreadnoughts
Up to 2	Battle Carriers
Up to 3	Assault Carriers
Up to 2	Battlecruiser Squadrons
Up to 1	Leviathan
Up to 2	Battle Stations

Tier 2	
Between 2 and 4 Squadrons, chosen from the following:	
Up to 3	Escort Carrier Squadrons
Up to 4	Cruiser Squadrons
Up to 4	Light Cruiser Squadrons
Up to 2	Heavy Cruiser Squadrons
Up to 3	Destroyer Squadrons
Up to 3	Assault or Torpedo Cruiser Squadrons
Up to 2	Gunship Squadrons
Up to 2	R&D Cruiser Squadrons
Up to 2	Defence Platform Squadrons

Tier 3	
Between 3 and 5 Squadrons, chosen from the following:	
Up to 4	Frigate Squadrons
Up to 3	Light Frigate Squadrons
Up to 4	Drone Squadrons
Up to 3	Corvette Squadrons

## Mighty Armadas

If the agreed MFV is in excess of 2000 Points the force is divided into separate Fleets, each with its own Admiral, TACs, *etc.* A force of between 2001 and 2800 Points is formed into one Grand Fleet and one Patrol Fleet, while a force of between 2801 and 3200 Points is divided into one Grand Fleet and one Battle Fleet and so on.

Provided the minimum requirements for each Fleet can be met, you may divide your MFV between the Fleets as you see fit. For example, a 2300 Point force could contain a 1900 Point Grand Fleet and a 400 Point Patrol Fleet, or a 1500 Point Grand Fleet and an 800 Point Patrol Fleet.

## Alliance Fleets

In addition to selecting Squadrons of Directorate models, up to one quarter of your Fleet's Maximum Fleet Value

(rounded down) may be chosen from other races and factions within the Zenian League, including vessels from the Dindrenzi Federation and Relthoza, and any of those found within the Zenian League Fleet Manual. This turns your Fleet into an 'Alliance Fleet'.

Your Fleet's minimum required Squadrons from each Tier MUST be from the Directorate, and your Fleet Admiral must be placed on a Tier 1 Directorate model.

Each Squadron uses the Command Distance of its race or faction and your Fleet's Fleet Tactics Bonus is the LOWEST from the races which make up your Fleet. Finally, an Alliance Fleet cannot take Tactical Ability Cards listed as 'Directorate Only'; only General or Zenian League cards may be used.

Otherwise, each Squadron is chosen as normal, using up the relevant Squadron selection for its Tier and paying the required Points Cost, with all Upgrades, Hard Points and accompaniments available for purchase.

## Allied Squadrons

A single Squadron can only contain models from ONE race or faction. For example, a Squadron could not be comprised of two Dindrenzi Cruisers and a Directorate Heavy Cruiser.

The exception to this is where a Statistics Profile specifically lists models from another race or faction amongst its accompaniments. For example, a Directorate Battleship can be accompanied by '0-3 Zenian League Escorts'. These may come from any race or faction within the Zenian League, for the listed points cost.

**Important Note:** Even if the only models selected from outside the Directorate are an Accompaniment to a Directorate model, the Fleet is still considered an Alliance Fleet, and any associated penalties in Fleet Tactics Bonus and Tactical Ability Card selection apply.

## Natural Alliance

Certain races and factions within the Firestorm Galaxy will work together more readily than others, their goals or origin making them Natural Allies.

Directorate Fleets are Natural Allies with Works Raptor. One quarter of your MFV in a Directorate Fleet may be chosen from Works Raptor models, in addition to the one quarter allowed in an Alliance Fleet. This means a full half of a Directorate Fleet could be comprised of Works Raptor models.

Additionally, if a Directorate Fleet contains only Directorate and Works Raptor models, 'Directorate Only' TACs may be chosen and used by all Squadrons in the Fleet.

DIRECTORATE FLEET STATISTICS	
Fleet Tactics Bonus	1
Command Distance	6"

# DREADNOUGHT

0-3 Zenian League Escorts						Variable	

This document is intended to provide you with the various statistics needed to use our spaceship models with the Firestorm Armada 2.0 rules. This Fleet Manual is what we refer to as a *'living document'*, meaning that as new models are created their statistics will be added and the document will expand.

Additionally, should any errata be found with printed materials they will be reflected in this document. As such, you should always use the statistics found in this document as the default statistics when you are playing Firestorm Armada. Please refer back to this download on a regular basis to ensure that you are playing with the latest version of statistics.

Turrets (Any)				5	10	9	6
Turrets (Any)				5	10	9	6
Cyberwarfare Weapons				10"	20"	30"	40"
Turrets (Any)				10	9	8	5
Turrets (Any)				10	9	8	5
MARs							
Countermeasures, Launch Tubes, Manoeuvrable, No FSD							
Hardpoints						Points	
Select up to TWO from the following:							
0-1: +2 PD						Free	
0-2: +3 Wing Capacity						+5	
0-1: +3 AP						+5	
0-1: Add a second Cyberwarfare Turret						+20	
Upgrades						Points	
Give all Beam Weapons the Biohazard Ammo MAR						+5	
Gain the Special Forces MAR						+5	

**Important Note:** Weapons systems listed in **red** are not fitted to the vessel as standard, but may be taken by using a Hardpoint option.

**Important Note:** Installations, such as the Battle Station shown on this page, have two Movement values. The first is the distance that the Installation can move whilst under a player's control, just like any other model. The second is the distance that it will move during the End Phase of each Turn if the rules for Moving Terrain are being used. This movement is conducted in the same manner as other Terrain Movement.

# DEFENCE PLATFORM

## Neutralizer Class

Designation		DEFENCE PLATFORM					
Name		Neutralizer

# CRUISER

## Champion Class

### Accompaniment Rules:

The following rules are currently being tested by our Firestorm Focus Group, but we would very much like our player community to try out the following Accompaniment Rules for the ships on Pages 18 & 19:

- Add Accompaniment option to an Anarchist Battleship: 0-2 Impact Light Frigates.
- Add Accompaniment option to the Eliminator & Judgement Battleships: 0-2 Impact Light Frigates, 0-1 Ascendancy Escort Carriers.
- Add Accompaniment option to the Dominance & Overseer Carriers: 0-2 Ascendancy Escort Carriers.
- Add Accompaniment option to an Integration Assault Carrier: 0-2 Champion Cruisers.

Designation		CRUISER					
Name		Champion					
Size class		Medium Capital					
Squadron size		2-3					
DR	CR	Mv	HP	CP	AP	PD	MN
4	7	9"	4	2	2	3	0
Points Cost		Shield Rating		Wings		Turn Limit	
50		I		0		I"	
Beam Weapons				10"	20"	30"	40"
Fore (Fixed)				8	8	5	3

Torpedo Weapons				12"	24"	36"	48"
Starboard / Port				5	5	5	5
MARs							
Reinforced (Fore)							
Hardpoints						Points	
Select up to ONE from the following:							
0-1:Take the Beam Weapons						Free	
0-1:Take the Cyberwarfare Weapons						+5	
0-1:Take the Gravity Weapons, which have the Compressor Beam MAR						+10	
Upgrades						Points	
Give the Beam Weapons the Biohazard Ammo MAR						+5	
Change the Torpedo Weapons to Cyberwarfare Weapons, which have the Assault Robot Torpedoes MAR						Free	

### New MAR: Compressor Beam

A Gravity Weapon with the Compressor Beam MAR cannot use its weapons to execute a Control Usage Attack in the same manner as normal Gravitational Weaponry.

### Mixed Cruiser Squadrons

Up to one Cruiser in a Cruiser Squadron may instead be a Heavy Cruiser or an Escort Carrier, for the Points Cost listed in the relevant Statistics profile. Up to one Light Cruiser in a Light Cruiser Squadron may instead be a Standard Cruiser, Gunship or an Escort Carrier, again for the relevant Points Cost. In all cases, the minimum Squadron requirements must still be filled with standard Cruisers or Light Cruisers, and the Squadron cannot contain more models than its maximum Squadron Size.

# ASSAULT CARRIER

## Integration Class

Designation		ASSAULT CARRIER					
Name		Integration

+1 PD						+5	

**FIRESTORM**  
**ARMADA**

# FLEET MANUAL

# THE RELTHOZA

MASTERS OF THE DEEP RIFTS

As described in the Fleet Building chapter of the rulebook, one of the first things you will need to do before beginning a game of Firestorm Armada is construct your Fleet.

To build a Relthoza Fleet, you will use the Fleet Building chapter in the rulebook in conjunction with the information presented here, specifically the Composition Tables below and the Statistics Profiles listed on the following pages.

Each possible size of Fleet (Patrol Fleet, Battle Fleet or Grand Fleet) as determined by Maximum Fleet Value (MFV) has its own Composition Table. This table describes how many Squadrons of each Designation of model can be taken in the Fleet, including any allied choices. For example, a Patrol Fleet can contain up to two Squadrons with the Cruiser Designation.

## Patrol Fleets

If the agreed MFV is 800 Points or less, your Fleet is classed as a Patrol Fleet. You may select your Squadrons from the following list:

Tier 1 Between 1 and 2 Squadrons, chosen from the following:	
Up to 1	Battleship
Up to 2	Carriers
Up to 1	Assault Carrier
Up to 1	Heavy Cruiser Squadron
Up to 1	Battlecruiser
Up to 1	Battle Station

Tier 2 Between 1 and 2 Squadrons, chosen from the following:	
Up to 2	Cruiser Squadrons
Up to 1	Destroyer Squadron
Up to 1	Shunt Cruiser Squadron
Up to 1	Assault or Torpedo Cruiser Squadron
Up to 1	Gunship Squadron
Up to 1	Defence Platform Squadron

Tier 3 Between 1 and 3 Squadrons, chosen from the following:	
Up to 1	Light Cruiser Squadron
Up to 3	Frigate Squadrons
Up to 2	Light Frigates Squadrons
Up to 2	Corvette Squadrons

**Important Note:** In a Patrol Fleet, the Battlecruiser's Squadron Size is reduced to 1.

Consult each model's Statistic Profile to find its Designation. You will notice that some of the Designations listed below cannot be found in the following Statistics pages. This is to accommodate both additional models that will follow in the future, and those available to Alliance Fleets as discussed on the next page.

The Composition Tables also divide the available Designations into Tiers. Each Tier has a minimum and a maximum limit, on top of the restrictions per designation. For example, in a Patrol Fleet you can field up to two Tier 1 Squadrons, chosen from up to 1 Battleship, up to 2 Carriers and so on.

Which Tier a Squadron falls into also affects how the Squadron influences your Battle Log, as described in the Victory Conditions chapter of the rulebook.

## Battle Fleets

If the agreed MFV is between 801 and 1200 Points, your Fleet is classed as a Battle Fleet. You may select your Squadrons from the following list:

Tier 1 Between 1 and 3 Squadrons, chosen from the following:	
Up to 2	Battleships
Up to 3	Carriers
Up to 1	Dreadnought
Up to 1	Battle Carrier
Up to 2	Assault Carriers
Up to 1	Battlecruiser Squadron
Up to 1	Battle Station

Tier 2 Between 1 and 3 Squadrons, chosen from the following:	
Up to 3	Cruiser Squadrons
Up to 2	Heavy Cruiser Squadrons
Up to 2	Destroyer Squadrons
Up to 1	Assault or Torpedo Cruiser Squadron
Up to 1	Gunship Squadron
Up to 1	Shunt Cruiser Squadron
Up to 1	Defence Platform Squadron

Tier 3 Between 2 and 4 Squadrons, chosen from the following:	
Up to 2	Light Cruiser Squadrons
Up to 4	Frigate Squadrons
Up to 2	Light Frigates Squadrons
Up to 2	Corvette Squadrons

## Grand Fleets

If the agreed MFV is between 1201 and 2000 Points, your Fleet is classed as a Grand Fleet. You may select your Squadrons from the following list:

Tier 1	
Between 2 and 4 Squadrons, chosen from the following:	
Up to 3	Battleships
Up to 4	Carriers
Up to 2	Dreadnoughts
Up to 2	Battle Carriers
Up to 3	Assault Carriers
Up to 2	Battlecruiser Squadrons
Up to 1	Leviathan
Up to 2	Battle Stations

Tier 2	
Between 2 and 4 Squadrons, chosen from the following:	
Up to 4	Cruiser Squadrons
Up to 3	Heavy Cruiser Squadrons
Up to 3	Destroyer Squadrons
Up to 2	Assault or Torpedo Cruiser Squadrons
Up to 2	Gunship Squadrons
Up to 2	Shunt Cruiser Squadrons
Up to 2	Defence Platform Squadrons

Tier 3	
Between 3 and 6 Squadrons, chosen from the following:	
Up to 2	Light Cruiser Squadrons
Up to 6	Frigate Squadrons
Up to 2	Light Frigates Squadrons
Up to 3	Corvette Squadrons

## Mighty Armadas

If the agreed MFV is in excess of 2000 Points the force is divided into separate Fleets, each with its own Admiral, TACs, *etc.* A force of between 2001 and 2800 Points is formed into one Grand Fleet and one Patrol Fleet, while a force of between 2801 and 3200 Points is divided into one Grand Fleet and one Battle Fleet and so on.

Provided the minimum requirements for each Fleet can be met, you may divide your MFV between the Fleets as you see fit. For example, a 2300 Point force could contain a 1900 Point Grand Fleet and a 400 Point Patrol Fleet, or a 1500 Point Grand Fleet and an 800 Point Patrol Fleet.

## Alliance Fleets

In addition to selecting Squadrons of Relthoza models, up to one quarter of your Fleet's Maximum Fleet Value (rounded down) may be chosen from other races and factions within

the Zenian League, including vessels from the Directorate and Dindrenzi Federation, and any of those found within the Zenian League Fleet Manual. This turns your Fleet into an 'Alliance Fleet'.

Your Fleet's minimum required Squadrons from each Tier **MUST** be from the Relthoza, and your Fleet Admiral must be placed on a Tier 1 Relthoza model.

Each Squadron uses the Command Distance of its race or faction and your Fleet's Fleet Tactics Bonus is the **LOWEST** from the races which make up your Fleet. Finally, an Alliance Fleet cannot take Tactical Ability Cards listed as 'Relthoza Only'; only General or Zenian League cards may be used.

Otherwise, each Squadron is chosen as normal, using up the relevant Squadron selection for its Tier and paying the required Points Cost, with all Upgrades, Hard Points and accompaniments available for purchase.

### Allied Squadrons

A single Squadron can only contain models from **ONE** race or faction. For example, a Squadron could not be comprised of two Relthoza Cruisers and a Directorate Heavy Cruiser.

The exception to this is where a Statistics Profile specifically lists models from another race or faction amongst its accompaniments. For example, a Relthoza Battleship can be accompanied by '0-3 Zenian League Escorts'. These may come from any race or faction within the Zenian League, for the listed points cost.

**Important Note:** Even if the only models selected from outside the Relthoza are an Accompaniment to a Relthoza model, the Fleet is still considered an Alliance Fleet, and any associated penalties in Fleet Tactics Bonus and Tactical Ability Card selection apply.

### Natural Alliance

Certain races and factions within the Firestorm Galaxy will work together more readily than others, their goals or origin making them Natural Allies.

Relthoza Fleets are Natural Allies with the Ba'Kash. One quarter of your MFV in a Relthoza Fleet may be chosen from Ba'Kash models, in addition to the one quarter allowed in an Alliance Fleet. This means a full half of a Relthoza Fleet could be comprised of Ba'Kash models.

Additionally, if a Relthoza Fleet contains only Relthoza and Ba'Kash models, 'Relthoza Only' TACs may be chosen and used by all Squadrons in the Fleet and used by all Squadrons in the Fleet.

THE RELTHOZA FLEET STATISTICS	
Fleet Tactics Bonus	2
Command Distance	8"

This document is intended to provide you with the various statistics needed to use our spaceship models with the Firestorm Armada 2.0 rules. This Fleet Manual is what we refer to as a '*living document*', meaning that as new models are created their statistics will be added and the document will expand.

Additionally, should any errata be found with printed materials they will be reflected in this document. As such, you should always use the statistics found in this document as the default statistics when you are playing Firestorm Armada. Please refer back to this download on a regular basis to ensure that you are playing with the latest version of statistics.

Starboard / Port				9	11	7	-
Fore				9	11	7	-
Aft				9	11	7	-
Torpedo Weapons				12"	24"	36"	48"
Any				6	8	8	10
Any				6	8	8	10
MARs							
Bigger Batteries, Manoeuvrable, No FSD, Self Repair, Systems Network							
Hardpoints						Points	
Select up to TWO from the following:							
0-I: Remove the No FSD MAR						+40	
0-I: Gain the Launch Tubes MAR						+5	
0-I: +4" Command Distance						+10	
0-I: +2 Wing Capacity						+5	
Upgrades						Points	
EITHER Give all Primary Weapons the Biohazard Ammo MAR						+10	
OR Give all Primary Weapons the Corrosive MAR						+15	

**Important Note:** Installations, such as the Battle Station shown on this page, have two Movement values. The first is the distance that the Installation can move whilst under a player's control, just like any other model. The second is the distance that it will move during the End Phase of each Turn if the rules for Moving Terrain are being used. This movement is conducted in the same manner as other Terrain Movement.

# SHUNT CRUISER

0-1: Gain the Stealth Systems MAR						Free	
Upgrades						Points	
Gain the Precision Strike MAR						+5	
Give the Torpedo Weapons the Corrosive MAR						+5	

### Accompaniment Rules:

The following rules are currently being tested by our Firestorm Focus Group, but we would very much like our player community to try out the following Accompaniment Rules for the ships on Pages 14 & 15:

- Add Accompaniment option to an Ootheca Assault Carrier: 0-2 Iramon Light Cruisers.
- Add Accompaniment option to the Brood & Nexus Battleships: 0-2 Iramon Light Cruisers, 0-2 Erigone Light Frigates.
- Add Accompaniment option to the Hive & Theridion Carriers: 0-2 Iramon Light Cruisers, 0-2 Virulence Gunships.
- Add Accompaniment option to a single Raptor Battlecruiser: 0-2 Erigone Light Frigates.

### Mixed Cruiser Squadrons

Up to one Cruiser in a Cruiser Squadron may instead be a Heavy Cruiser or an Escort Carrier, for the Points Cost listed in the relevant Statistics profile. Up to one Light Cruiser in a Light Cruiser Squadron may instead be a Standard Cruiser, Gunship or an Escort Carrier, again for the relevant Points Cost. In all cases, the minimum Squadron requirements must still be filled with standard Cruisers or Light Cruisers, and the Squadron cannot contain more models than its maximum Squadron Size.

# LIGHT CRUISER

## Iramon Class

Designation		LIGHT CRUISER					
Name		Iramon					
Size class		Medium Capital					
Squadron size		2-3					
DR	CR	Mv	HP	CP	AP	PD	MN
4	6	10"	4	4	2	2	0
Points Cost		Shield Rating		Wings		Turn Limit	
35		Cloaking Field		0		1"	
Primary Weapons				8"	16"	24"	32"
Fore (Fixed)				4	5	1	-
Torpedo Weapons				12"	24"	36"	48"
Fore				5	4	4	-
MARs							
Improved Shunt Matrix (3)							
Hardpoints						Points	
Select up to ONE of the following:							
0-1: Upgrade the Improved Shunt Matrix (3) MAR to Improved Shunt Matrix (4)						+5	
0-1: Gain the Stealth Systems MAR						Free	
Upgrades						Points	
EITHER Give all Primary Weapons the Biohazard MAR						+5	
OR Give all Primary Weapons the Corrosive MAR						+5	

# LIGHT FRIGATE

## Erigone Class

Designation		LIGHT FRIGATE					
Name		Erigone					
Size class		Small					
Squadron size		3-6					
DR	CR	Mv	HP	CP	AP	PD	MN
3	5	12"	2	2	0	1	0
Points Cost		Shield Rating		Wings		Turn Limit	
20		0		0		0"	
Primary Weapons				8"	16"	24"	32"
Fore				2	3	-	-
Torpedo Weapons				12"	24"	36"	48"
Starboard / Port				3	3	3	4
MARs							
Difficult Target, Systems Network							

### New MAR: Improved Shunt Matrix

Functioning as the standard shunt matrix, with the exception that a single roll is made for the entire Squadron, rather than per model as for Shunt Matrix.

Provided the bracketed value is the same, models with this MAR which are acting as accompaniments to other models with the standard Shunt Matrix MAR, will bestow the benefit of the single roll to ALL models in the Squadron.

# ASSAULT CARRIER

## Ootheca Class

Designation		ASSAULT CARRIER					
Name		Ootheca					
Size class		Large Capital					
Squadron size		I					
DR	CR	Mv	HP	CP	AP	PD	MN

Hardpoints						Points	
Select up to TWO from the following:							
0-1: +1 PD						+5	
0-1: Gain a Cloaking Field, Remove the Planetfall MAR						+5	

In addition to the three major races which make up the Zenian League; the Dindrenzi Federation, the Relthoza and the Directorate, numerous smaller factions joined the League to expand their domains, increase their influence or earn great wealth from the coming war. The most powerful of these factions have contributed significant numbers of ships to the war effort, either in fully formed fleets, or as auxiliaries within larger formations. Each of these factions has their own motivations within the Zenian cause, and their own unique vessels and tactics that they bring to battle.

An elite organisation with strong ties to the notoriously war-mongering '*Church of the Dramos Angels*', the Rense System Navy (RSN) are a powerful driving force within the Zenian League. Counting the cream of the Dindrenzi navy amongst their crews, these highly motivated men and women lead the invasion from the front lines and often from deep within enemy territory. Works Raptor, the foremost developer of military technology within the Directorate have dispatched many of their cutting edge vessels to war zones across the sector. Knowing the value live-fire test data can be to their research, they are always armed with the latest, most destructive weapons their tireless laboratories can devise.

Hungry to increase their standing within the galaxy, the Kedorians have brought their giant, city-like ships to battle with Kurak forces. With high-powered laser batteries covering every face, and advanced fold-space drives at their core, the Kedorians will see their civilisation rise to galactic prominence. Finally, a race of mercenaries and plunderers for many centuries, the Ba'Kash thrive on conflict. Fighting under the Zenian banner gives them freedom to raid and pillage with abandon, with strong allies at their back, and ancient foes, the Sorylian Collective, ahead, prospects amongst the Ba'Kash clans have never seemed brighter.

## Fleet Building

The models in this Fleet Manual can be used in two different ways. They can be taken alongside models from the Dindrenzi Federation, Directorate or Relthoza as part of an Alliance Fleet, or they can be fielded as a dedicated Zenian Support Fleet which will only contain models from within this Manual.

The rules for building Alliance Fleets so that these models can be used alongside the Dindrenzi Federation, Directorate and Relthoza are given in their respective Fleet Manuals. Using these, with the Statistics Profiles presented here and the Fleet Building chapter of the rulebook you will be able to create a versatile and highly effective fighting force.

The following rules and Composition Tables apply to Zenian Support Fleets.

## Zenian Support Fleets

Unlike Alliance Fleets, Zenian Support Fleets do not contain any models from the three major races, instead, they are comprised entirely of models from this Fleet Manual.

As you will see when looking through the following Statistics Profiles, the models within this Manual are grouped into different factions; the Ba'Kash, the Kedorians, the Rense System Navy and Works Raptor. To construct a Zenian Support Fleet, you first need to select one of these to be your Core Faction.

Your Fleet's minimum required Squadrons from each Tier MUST be chosen from the models available to this Faction, and your Fleet Admiral must be placed on a Tier 1 model belonging to this Faction.

Apart from this, you may fill out the remainder of your Fleet using the models available either to your Core Faction, or the other factions within this Manual. The Fleet follows the normal Fleet Building rules and procedure as laid out in the Fleet Building section of the rulebook, with the Composition Tables found on the following page governing how many of each type of Squadron can be fielded, and which Tiers they fall into.

As with the standard and Alliance Fleets, which Composition Table you should use is determined by the Maximum Fleet Value (MFV) you have agreed with your opponent.

## Allied Squadrons

Although a Zenian Support Fleet will often contain Squadrons from several different factions, a single Squadron can only contain models from ONE race or faction. For example, a Squadron could not be comprised of two Ba'Kash Cruisers and an RSN Heavy Cruiser.

The exception to this is where a Statistics Profile specifically lists models from another race or faction amongst its accompaniments. For example, a Ba'Kash Battle Carrier can be accompanied by '0-3 Zenian League Escorts'. These may come from any race or faction within the Zenian League, including the Dindrenzi Federation, Directorate or Relthoza, for the listed points cost. These are the only models from these major races allowed within a Zenian Support Fleet.

## Fleet Statistics and Tactical Ability Cards

Zenian Support Fleets may choose their Tactical Ability Cards from the general or Zenian League lists.

Your Fleet Tactics Bonus is that of your Core Faction, however each Squadron has the Command Distance of its own Faction.

For example, a Zenian Support Fleet with the Rense System Navy as its Core Faction will have a Fleet Tactics Bonus of 3 and the Rense System Navy Squadrons within the Fleet will have a Command Distance of 6". However, a Ba'Kash Squadron joining the Fleet will keep the Ba'Kash Command Distance of 7".

## Patrol Fleets

If the agreed MFV is 800 Points or less, your Fleet is classed as a Patrol Fleet. You may select your Squadrons from the following list:

Tier 1	
Between 1 and 2 Squadrons, chosen from the following:	
Up to 1	Battleship
Up to 1	Battle Carrier
Up to 1	Battlecruiser
Up to 2	Carriers
Up to 1	Assault Carrier
Up to 1	Heavy Cruiser Squadron

Tier 2	
Between 1 and 2 Squadrons, chosen from the following:	
Up to 2	Cruiser Squadrons
Up to 1	Destroyer Squadron
Up to 2	Assault or Torpedo Cruiser Squadrons

Tier 3	
Between 1 and 3 Squadrons, chosen from the following:	
Up to 2	Frigate Squadrons
Up to 2	Corvette Squadrons

## Battle Fleets

If the agreed MFV is between 801 and 1200 Points, your Fleet is classed as a Battle Fleet. You may select your Squadrons from the following list:

Tier 1	
Between 1 and 3 Squadrons, chosen from the following:	
Up to 2	Battleships
Up to 1	Battle Carrier
Up to 1	Battlecruiser Squadron
Up to 1	Dreadnought
Up to 3	Carriers
Up to 2	Assault Carriers

Tier 2	
Between 1 and 3 Squadrons, chosen from the following:	
Up to 3	Cruiser Squadrons
Up to 2	Heavy Cruiser Squadrons
Up to 1	Destroyer Squadron
Up to 2	Assault or Torpedo Cruiser Squadrons

Tier 3	
Between 2 and 4 Squadrons, chosen from the following:	
Up to 3	Frigate Squadrons
Up to 3	Corvette Squadrons

## Grand Fleets

If the agreed MFV is between 1201 and 2000 Points, your Fleet is classed as a Grand Fleet. You may select your Squadrons from the following list:

Tier 1	
Between 2 and 4 Squadrons, chosen from the following:	
Up to 3	Battleships
Up to 2	Battlecruiser Squadrons
Up to 4	Carriers
Up to 2	Dreadnoughts
Up to 2	Battle Carriers
Up to 3	Assault Carriers

Tier 2	
Between 2 and 4 Squadrons, chosen from the following:	
Up to 4	Cruiser Squadrons
Up to 3	Heavy Cruiser Squadrons
Up to 3	Destroyer Squadrons
Up to 3	Assault or Torpedo Cruiser Squadrons

Tier 3	
Between 3 and 5 Squadrons, chosen from the following:	
Up to 5	Frigate Squadrons
Up to 4	Corvette Squadrons

## Mighty Armadas

If the agreed MFV is in excess of 2000 Points the force is divided into separate Fleets, each with its own Admiral, TACs, etc. Each Fleet may also select a different Core Faction. A force of between 2001 and 2800 Points is formed into one Grand Fleet and one Patrol Fleet, while a force of between 2801 and 3200 Points is divided into one Grand Fleet and one Battle Fleet and so on.

Provided the minimum requirements for each Fleet can be met, you may divide your MFV between the Fleets as you see fit. For example, a 2300 Point force could contain a 1900 Point Grand Fleet and a 400 Point Patrol Fleet, or a 1500 Point Grand Fleet and an 800 Point Patrol Fleet.

**Important Note:** This document is intended to provide you with the various statistics needed to use our spaceship models with the Firestorm Armada 2.0 rules. This Fleet Manual is what we refer to as a 'living document', meaning that as new models are created their statistics will be added and the document will expand.

Additionally, should any errata be found with printed materials they will be reflected in this document. As such, you should always use the statistics found in this document as the default statistics when you are playing Firestorm Armada. Please refer back to this download on a regular basis to ensure that you are playing with the latest version of statistics.

# MARAUDERS STATISTICS

Updated July 12, 2016

Version 2.0 Compliant

The models in this Fleet Manual can be used in two different ways. With the exception of the Pathogen, they can be taken as Mercenaries alongside models from any other Fleet (where they occupy the 25% Allies slot), or they can be fielded as a dedicated Marauder Fleet that will only contain models from within this Manual.

**Important Note:** Any Mercenaries taken fill the same 'quarter' of your Maximum Fleet Value as allied models. You cannot spend one quarter on Allied Squadrons, one quarter on Mercenary Squadrons and one quarter on Natural Allies, instead you can field up to one quarter Allied and Mercenary Squadrons, up to one quarter Natural Allies and must field at least one half of the MFV from your main fleet.

## Marauder Fleets

Marauder Fleets do not contain any models from the major races or alliance factions, instead, they are comprised entirely of models from within this Fleet Manual.

As you will see when looking through the following Statistics Profiles, the models within this Manual are grouped into different factions: OmniDyne Special Operations (OSO – including OmniDyne and Corsairs), Syndicated Traders League (STL – including Syndicate and Traders), the Oroshan, and the Pathogen. To construct a Marauder Fleet, you first need to select one of these to be your Core Faction.

Your Fleet's minimum required Squadrons from each Tier **MUST** be chosen from the models available, and your Fleet Admiral must be placed on a Tier 1 model belonging to this Faction.

Apart from this, you may fill out the remainder of your Fleet using the models available either to your Core Faction, or the other factions within this Manual. The Fleet follows the normal Fleet Building rules and procedure as laid out in the Fleet Building section of the rulebook, with the Composition Tables found on the following page governing how many of each type of Squadron can be fielded, and which Tiers they fall into.

As with the standard and Alliance Fleets, which Composition Table you should use is determined by the Maximum Fleet Value (MFV) you have agreed with your opponent.

### Allied Squadrons

Although a Marauder Fleet will often contain Squadrons from several different factions, a single Squadron can only contain models from ONE race or faction.

### Fleet Statistics and Tactical Ability Cards

Marauder Fleets may choose their Tactical Ability Cards from the general or Marauder lists.

Your Fleet Tactics Bonus is that of your Core Faction, however each Squadron has the Command Distance of its own Faction. For example, a Marauder Fleet with the Syndicated Traders League as its Core Faction will have

a Fleet Tactics Bonus of 2 and the Syndicate Squadrons within the Fleet will have a Command Distance of 6".

### Pathogen

Models from the Pathogen **CANNOT** be taken in any Fleet unless Pathogen is the Core Faction. If Pathogen is chosen as the Core Faction, no models from any other faction may be taken.

### OmniDyne Special Operations (OSO)

OSO are loosely aligned with the Zenian League. As such, they may be taken as part of any fleet in the Zenian League (including core races) for the points indicated. They may also be fielded by fleets within the Alliance of Kurak, but in this case they cost the points indicated in brackets on their profile.

OSO OmniDyne are also Natural Allies with the Directorate, and up to 50% of your Maximum Fleet Value (rounded down) may be spent on OmniDyne models within a Directorate fleet. However, if a fleet contains any OmniDyne models, it may not include Works Raptor models (see Table on Page 4).

### Syndicated Traders League (STL)

The STL are loosely aligned with the Alliance of Kurak. As such, they may be taken as part of any fleet in the Alliance of Kurak (including core races) for the points indicated. They may also be fielded by fleets within the Zenian League, but in this case they cost the points indicated in brackets on their profile.

The STL are also Natural Allies with the Terran Alliance, and up to 50% of your Maximum Fleet Value (rounded down) in a Terran Alliance fleet may be spent on STL Syndicate or STL Traders models. Due to lingering animosity between the Aquans and the Syndicate, any fleet containing Aquan models may field STL Syndicate models, but at the bracketed cost (see Table on Page 4).

### Escorts

Where a ship profile in another book specifies an Alliance of Kurak or Zenian League Escort, this may also be substituted by any OSO or STL ship with an Escort designation. The appropriate cost should be paid according to whether the faction is aligned with the fleet in question (where the standard cost is paid) or not (where the bracketed cost is paid).

## Mercenaries

In any other Fleet, you may spend up to one quarter of your Maximum Fleet Value (rounded down) on models chosen from within this Fleet Manual, apart from those belonging to Pathogen.

Your Fleet's minimum required Squadrons from each Tier **MUST** be from your main fleet, and your Fleet Admiral must be placed on a Tier 1 model from within your main fleet.

Each Squadron uses the Command Distance of its race or faction and your Fleet's Fleet Tactics Bonus is the LOWEST from the races which make up your Fleet. Finally, if you take Mercenaries in your Fleet, only General Tactical Ability Cards may be used.

Otherwise, each Squadron is chosen as normal, using up the relevant Squadron selection for its Tier and paying the required Points Cost (ensuring the correct points are paid depending on whether the fleet is from the Alliance of Kurak or Zenian League) – as shown on the Table on Page 4 – with all Upgrades, Hard Points and accompaniments available for purchase.

## Marauder Patrol Fleets

If the agreed MFV is 800 Points or less, your Fleet is classed as a Patrol Fleet. You may select your Squadrons from the following list:

Tier 1 Between 1 and 2 Squadrons, chosen from the following:	
Up to 1	Battleship
Up to 2	Carrier Squadrons
Up to 1	Battle Carrier
Up to 1	Captured Large Squadron
Up to 1	Battlecruiser

Tier 2 Between 1 and 2 Squadrons, chosen from the following:	
Up to 2	Cruiser Squadrons
Up to 2	Captured Medium Squadrons
Up to 1	Gunship Squadron

Tier 3 Between 1 and 3 Squadrons, chosen from the following:	
Up to 2	Frigate Squadrons
Up to 2	Captured Small Squadrons
Up to 2	Corvette Squadrons

**Important Note:** In a Patrol Fleet, a Battlecruiser's Squadron Size is reduced to 1, if is not 1 already.

## Marauder Battle Fleets

If the agreed MFV is between 801 and 1200 Points, your Fleet is classed as a Battle Fleet. You may select your Squadrons from the following list:

Tier 1 Between 1 and 3 Squadrons, chosen from the following:	
Up to 2	Battleships
Up to 2	Battle Carriers
Up to 1	Battle Station
Up to 2	Battlecruiser Squadrons
Up to 1	Dreadnought
Up to 3	Carrier Squadrons
Up to 2	Captured Large Squadrons

Tier 2 Between 1 and 3 Squadrons, chosen from the following:	
Up to 3	Cruiser Squadrons
Up to 2	Gunship Squadrons
Up to 3	Captured Medium Squadrons

Tier 3 Between 2 and 4 Squadrons, chosen from the following:	
Up to 3	Frigate Squadrons
Up to 3	Captured Small Squadrons
Up to 3	Corvette Squadrons

## Marauder Grand Fleets

If the agreed MFV is between 1201 and 2000 Points, your Fleet is classed as a Grand Fleet. You may select your Squadrons from the following list:

Tier 1 Between 2 and 4 Squadrons, chosen from the following:	
Up to 3	Battleships
Up to 3	Battle Carriers
Up to 2	Battle Stations
Up to 3	Battlecruiser Squadrons
Up to 4	Carrier Squadrons
Up to 2	Dreadnoughts
Up to 3	Captured Large Squadrons

Tier 2 Between 2 and 4 Squadrons, chosen from the following:	
Up to 4	Cruiser Squadrons
Up to 2	Gunship Squadrons
Up to 4	Captured Medium Squadrons

Tier 3 Between 3 and 5 Squadrons, chosen from the following:	
Up to 5	Frigate Squadrons
Up to 5	Captured Small Squadrons
Up to 5	Corvette Squadrons

## Marauder Mighty Armadas

If the agreed MFV is in excess of 2000 Points the force is divided into separate Fleets, each with its own Admiral, TACs, etc. Each Fleet may also select a different Core Faction. A force of between 2001 and 2800 Points is formed into one Grand Fleet and one Patrol Fleet, while a force of between 2801 and 3200 Points is divided into one Grand Fleet and one Battle Fleet and so on.

Provided the minimum requirements for each Fleet can be met, you may divide your MFV between the Fleets as you see fit. For example, a 2300 Point force could contain a 1900 Point Grand Fleet and a 400 Point Patrol Fleet, or a 1500 Point Grand Fleet and an 800 Point Battle Fleet.

**Marauder Patrol Fleet**  
Tier 2 - Up to 2 Light Cruiser Squadrons  
- Up to 1 Escort Cruiser Squadron

**Marauder Battle Fleet**  
Tier 2 - Up to 2 Escort Cruiser Squadrons  
Tier 3 - Up to 2 Light Cruiser Squadrons

**Marauder Grand Fleet**  
Tier 2 - Up to 3 Escort Cruiser Squadrons  
Tier 3 - Up to 3 Light Cruiser Squadrons

## The Syndicated Traders League

---

Since its origins in the Rift, The Syndicate has become a force to be reckoned with in the larger confines of the Storm Zone. The shady Vylia'sal Syndicate extended its hold and infiltration of the former Rift Traders League, using subterfuge, political scheming and ultimately, brute force.

Using the legitimate trading front of the RTL, the Syndicate grew even larger and more powerful, forging stronger links with Terran Alliance worlds, leaders and even military assets. Eventually it grew to the point where it transformed itself into an organisation that could stand outside of the shelter of the Rift, confident in its position as a partner to the strongest galactic powers. Thus was born the Syndicated Traders League (STL).

This could not have come at a better time for Tauris, since the loss (and presumed destruction) of the Supermax-89 facility on one of its more dangerous enforcement missions.

Nevertheless, his political manoeuvring with key Terran players has given him access to a number of older and previously decommissioned Reformer-class stations which he has used to great effect – so much so that even Terran Admirals have fielded these assets themselves.

This newly-wielded legitimacy meant Tauris Vylia'sal could even broker an uneasy amnesty from the many Aquan Sebrutan warrants held against him. This is not something that pleased the Aquan hierarchy, but the unbridled political power Tauris wields amongst many of the Alliance of Kurak members, including the powerful Terrans, now meant they had little choice in the matter. He is not welcomed by the Aquans, but he is tolerated – for the time being, at least.

Stronger ties with the Kurak Alliance have allowed Tauris to strengthen his position against OmniDyne's interference in his dealings in the Rift and further afield.

Although this rivalry has continued to simmer, the STL and OmniDyne factions will cooperate for mutual benefit, usually when some venture of dubious legality and high profitability is involved. This is probably down to the relentless pursuit of personal power of both Tauris and OmniDyne's successful CEO Asger Nerivar – two individuals of equal drive, ruthlessness and complete amorality.

## OmniDyne Special Operations (OSO)

---

Since rising from his former COO position to CEO, Nerivar has gone from strength to strength. Cleverly gaining knowledge of the Rift from the Corsairs in exchange for Directorate weapons technology, he provided OmniDyne with both a source of valuable income and a tactical advantage against the Syndicate operating in the Rift. This appeared to provide the various Corsair factions with a convenient money-laundering outlet, but also gradually made them more dependent on OmniDyne for supplies, ammunition and political backup.

Harnessing these forces, and with carefully drawn mercenary contracts with the Oroshan, Nerivar turned OmniDyne's fortunes around. From the prospect of breakup, absorption and asset stripping (to say nothing of contractual termination of its management), he crafted a new rising star within the Directorate group of companies. Paying its outstanding debts was, of course, the last thing that the management of the Directorate giant Works Raptor wanted, and Nerivar has made many enemies amongst its senior management.

Hark Williams board members, however, saw the great opportunity OmniDyne's "special" interests and methods of doing business presented, and invested in the growing company – even inviting Nerivar to present personally to the board on several

occasions. The influx of ready capital allowed OmniDyne to expand further, reinventing itself as “OmniDyne Special Operations”. With a reputation for taking contracts rejected by other Directorate companies (for a price), the new OSO quickly proved its ability to deliver results, providing no questions were asked.

Fortunately for Nerivar, his powerful new acquaintances prevent a direct method of Works Raptor “deposing” him, and their management is content to wait until a more favourable set of market conditions again swing OmniDyne’s assets within reach of their steely financial jaws. Works Raptor still show their solidarity with their corporate associates, of course, although somehow their ships never seem to be available or in the right quadrant when assistance is requested....

The actual reality of the inner workings of OSO are, as many suspect (yet never voice

publically for fear of their lives), borderline or completely illegal. OmniDyne maintains and supplies large groups of corsairs and pirates – not only in the rift, but from across the battlefields and backwaters that exist or have developed across the Storm Zone.

These fleets are often comprised of the lowest lawless scum that accumulates around the edge of civilised systems – all are welcome in OSOs Contract Fulfilment Divisions.

They are supplied (at a healthy profit margin, of course) with Directorate weapons and supplies to enhance whatever ships they have. The weapons supplied may be legacy models, the supplies beyond their standard usage recommendations, but they still produce a formidable force of ships, few ever quite the same, and usually untraceable to their corporate overlords.

## The Oroshan

---

This large pool of essentially expendable forces has meant a scaling back of contracts for the capable but relatively expensive Oroshan mercenaries in the Storm Zone. Being staunch but pragmatic warriors at heart, many bloodtribes have expanded out from the Directorate systems where their contracts were once more plentiful. It is now increasingly common to see elements of the Hwyyirna working for the Alliance of Kurak as well as for the Zenian League.

## A Union of Mercenaries

---

Despite the closer ties that the STL have with the Alliance of Kurak, and the OSO's inclusion as part of the Directorate, these nefarious organisations are willing to work for almost anyone for the right price, even their supposed enemies. In dark corners of systems, on missions of suspicious or malign intent, unmarked OmniDyne ships will fight for Terran masters, and sleek Syndicate ships glide noiselessly beside cloaked Relthoza fleets. Dindrenzi forces stretched thin on an attack deep into Alliance space may shore up their defences with former Trading vessels, paid for by the day into STL coffers. Elsewhere Corsairs will happily ally with either Veydreth or Ba'Kash raiders to plunder rich colonies whilst their masters are away fighting on the front lines.

In short, the Marauders have black hearts and fickle loyalties, turned easily by the glint of riches and the temptation of quick profit. Their appearance on the field of battle can bring relief for some, but there is always the fear of the knife in the back... even for those paying their way.

## The Pathogen

---

The lack of a moral compass is not the only driver for a Corsairs' readiness to sign up for OSO contracts, however, nor the sole reason for Tauris' willingness to cosy up to the Terran Alliance. Across the length and breadth of the Rift, and increasingly in nearby systems, there are whispers of a nameless horror, tales of death-ships with no crew, and vessels that never return from routine runs. Men have been discovered in escape pods, their bodies alive, but their minds driven over the brink into insanity by the things they have witnessed.

Whatever their allegiances, the tidal force that increasingly drives this flotsam out of the Rift and into the wider Storm Zone are the Neomorphs known as the Pathogen. No longer a simple fusion of organic and inorganic forged by a Directorate-engineered military nanovirus, but a new order of life with unknown purposes and unfathomable reason.

Their attacks follow no known or predictable strategies, despite analysis by some of the best military AI systems in the sector. What is certain is that they grow stronger by the day, taking ships and vanishing, transforming them beyond primitive twisted artefacts into disturbing and increasingly consistent forms.

Whatever their true intent, these strange ships arrive without warning, uncommunicative but for bursts of incoherent static and meaningless chatter, firing weapons whose munitions change and shift the very nature of what they touch. All who have encountered them know that there is only one solution, one way to deal with this new form of life – and that is to offer it death, by any means possible.

Where the threat of the Pathogen will end is also uncertain – will it be contained and exterminated, expand to a steady state and remain passive, or become so dangerous it may even unite the warring factions in the Storm Zone against it?

## Marauders Faction Table

Faction		OSO		STL		Oroshan	Pathogen
		OmniDyne	Corsairs	Syndicate	Traders		
Alliance of Kurak	Aquan	(Bracket)	(Bracket)	(Bracket) <sup>1</sup>	Standard	Standard	X
	Terran	(Bracket)	(Bracket)	Standard <sup>2</sup>	Standard <sup>2</sup>	Standard	X

Marauders	OSO, STL & Oroshan	Standard	Standard	Standard	Standard	Standard	X
	Pathogen	X	X	X	X	X	Standard

<sup>1</sup> A fleet containing any Aquan models **MUST** pay the bracketed cost for Syndicate models

<sup>2</sup> A Terran fleet may take up to 50% STL models

<sup>3</sup> Directorate fleets may take up to 50% OmniDyne models

<sup>4</sup> A fleet containing Works Raptor models **MAY NOT** contain any OmniDyne models

Target their Engines

### MARAUDERS

*Often wishing to cripple and capture, rather than simply destroy their prey, marauder gunners know precisely where to place their shots in order to knock out a vessel's engines.*

Once this Turn, when you are about to roll on the Propulsion Systems damage table (either a D3 or a D6), instead you may automatically count the result as a 'Main Drive Failure Critical Hit Effect'.

2

RETRIEVAL COST

Virus Strike

### MARAUDERS

*Worms and viruses tailored to scramble a vessel's close range sensors can give a clear run for boarding shuttles and short range spacecraft.*

Select ONE model within 16" of your Admiral's Vessel.

The model's Point Defence is Disabled.

This can be repaired as normal.

2

RETRIEVAL COST

Inducement

### MARAUDERS

*Blackmail, bribery and the whole gamut of extortion techniques are fair game for Captains in the fleets of pirates and criminal cartels.*

Select ONE Squadron with a model within 16" of your Admiral's Vessel.

The Squadron must take an immediate Disorder Test.

If you lower your Battle Log by ONE before the Test is made, the Squadron requires an additional success to pass.

2

RETRIEVAL COST

Bug Out

### MARAUDERS

*"Kindly inform engineering that if the Fold Space Drive is not online within the next thirty seconds, they can consider their contracts terminated."*

Choose ONE Squadron in your Fleet. Place an FSD Marker on that Squadron.

This card cannot affect models with the No FSD MAR.

2

RETRIEVAL COST

The above TAC Cards have been created to supplement your TAC card deck. Spartan Games gives permission to print out for personal use.

Upgrades						Points	
Gain the Assault Blitz MAR						+5	

## New Model Assigned Rule

### Infestation

A model with the Infestation MAR gains a 'Boarding Assault Launched' Marker after launching a boarding assault as normal, but at the end of its next activation this marker is removed, and the model may perform another Boarding Assault if desired during its following activation. It may also never be captured by a boarding assault, only damaged or destroyed.

Additionally, if a model with the Infestation MAR chooses to Capture another model in a Boarding Assault, that model immediately replaces its stats with those of the Captured Pathogen model in its size class, with current HP and Wings the lower of either of the ships at time of capture, or the new Pathogen Class ship – this applies even if the target of the Boarding Assault is a Small vessel that would ordinarily be destroyed. Any Wings remaining on the Captured ship are replaced by Pathogen SRS as described in that section below.

It joins the Squadron of the model which captured it, and is not required to charge its Fold Space Drives when it next activates. If the Squadron that initiated the Boarding Assault now exceeds its unit size or legal composition, it will split into 2 squadrons, sized as the Pathogen player chooses within the legal composition limits.

Any ship with a "Captured" designation no longer has any effect on the Battle Log when reduced to half HP or destroyed.

## New Coherence Effect Rule

### Infestation Weapons (Coherence Effect)

If ALL Weapons contributing to an Attack are Infestation Weapons, the attacking ship does not count as having fired at the target for the purposes of boarding, and may launch a boarding assault directed at the target during the same activation.

## Pathogen Specific Rules

### Pathogen Squadrons

Due to their unique method of acquiring squadrons, Pathogen ships have a standard squadron size and a second number in parenthesis that shows their

upper squadron size limit including captured vessels (which also includes captured ships initially taken as accompaniments). Therefore a squadron of Aureus Class Frigates may be taken as a squadron of 2-6 ships, but have a maximum squadron size of 8, including captured ships.

Captured Pathogen ships may form irregular squadrons between size classes – for example, one Mitosis Medium and one Stem Small is a valid Squadron for Pathogen ships. Captured ships **do not** fill the minimum core requirements for a Pathogen Fleet, but may be taken during fleet building.

### Pathogen SRS

The Pathogen may not take standard SRS types, but only Pathogen SRS. These are a unique and deadly blend of other SRS properties, carrying their infection over longer distances. They have the profile:

**Pathogen SRS, 12" Range, AD 2; AP 2; PD 2, Cost: 10 Points**

They may make intercept moves against other SRS tokens, and hit other SRS tokens on a 4, 5 or 6. If after any dogfight in which the Pathogen SRS were not all Destroyed or Driven Off, and provided they destroyed one or more enemy tokens in that combat, then the Pathogen squadron may recover a single lost SRS (this may not cause them to exceed their original flight size).

For example, 3 Pathogen SRS are attacked by a flight of 2 interceptors. The Pathogen roll 6, 6, 5, 3, 3 & 1 whereas the interceptors achieve 6, 5, 2 and 1. The interceptors are destroyed, and the Pathogen are reduced to a strength of 2. However, as the Pathogen were not driven away and they destroyed at least 1 interceptor, they can recover one token, and so are at a strength of 3.

Additionally, if the SRS are involved in a boarding assault which results in the capture of an enemy ship, that ship is captured according to the rules in the Infestation MAR, and joins the SRS' parent carriers squadron (subject to size and composition limits as before).
